Aerial Optical Cable Manufacturer Direct Sales

Overview

Aerial Fiber Optic Cables | OPTRALWe offer loose fiber optic cables for aerial installations and high fiber density. Available with single or double sheath.

Key Takeaways

Direct sales of aerial optical cables are available from leading manufacturers like ZTO Cable, AFL, Prysmian, Optral, and Corning, offering ADSS, OPGW, Figure-8, and high-density ribbon cables. Leading Manufacturers and Product OfferingsZTO Cable: Offers durable ADSS, OPGW, and Figure-8 aerial fiber optic cables with a 30-year service life. They provide factory pricing, ISO certification, fast global shipping, and production cycles of 2–3 weeks.

Installation options include suspension type and self-supporting type, suitable for overhead power lines and cable supports.

AF

L: Provides a full portfolio of aerial fiber optic cables including ADSS, OPGW, SkyWrap, and MASS cables.

L also supplies supporting hardware and compression accessories for demanding transmission and distribution environments. Prysmian: Offers ultra-lightweight (ULW) aerial drop cables and ADSS cables for mid to long-span applications. Their cables are suitable for aerial and duct installations and can be used alongside power cables under 11kV.

Optral: Manufactures loose fiber optic cables for aerial installations with high fiber density, available in single or double sheath. Their products are certified by UL, Bureau Veritas, and DNV. Corning: Provides high-density ribbon and loose tube aerial cables, designed for fast installation and mass-fusion splicing.

Their dielectric cables are suitable for lashed aerial and duct installations, with fiber counts ranging from 12 to 432.

Key Considerations for Direct Purchase

Cable Type: Choose between self-supporting (ADSS) or messenger-supported (Figure-8) based on span length and load requirements. Fiber Count and Density: Options range from 12 fibers to over 400 fibers, including ribbon and loose tube designs. Certifications: Look for UL, ISO, Bureau Veritas, or DNV certifications to ensure quality and compliance.

Delivery and Production: Manufacturers like ZTO Cable offer 2–3 week production cycles and global shipping. Installation Methods: Suspension type uses a separate wire to bear the load, while self-supporting cables carry their own weight.

Conclusion

For direct sales of aerial optical cables, ZTO Cable, AFL, Prysmian, Optral, and Corning are reliable manufacturers offering a wide range of ADSS, OPGW, Figure-8, and high-density ribbon cables. Buyers can request factory quotes, confirm certifications, and select cables based on fiber count, installation method, and environmental requirements to ensure optimal performance for aerial network deployments.
