Cisco Aggregation Switch 3750

Overview

The Cisco® Catalyst® 3750 Series Switches (Figures 1 through 4) are innovative switches that improve LAN operating efficiency by combining industry-leading ease of use and high resiliency for stackable switches. This product series features Cisco StackWiseTM technology, a 32-Gbps stack interconnect. Page 2 Cisco StackWise technology unites up to nine individual Cisco Catalyst 3750 switches into a single logical unit, using special stack interconnect cables and stacking software. The stack behaves as a single switching unit that is managed by a master switch elected from one of the member. Would you like to learn how to configure Link aggregation on Cisco Switch using the command-line?

In this tutorial, we are going to show you all the steps required to configure a link aggregation on a Cisco Switch 2960 or 3750 using the command-line. These switches provide high availability, scalability, security, energy efficiency, and ease of operation with innovative features such as Cisco StackPowerTM, four optional network modules, redundant power supplies, and Media Access the appearance of WS-C3750X-12.
