Price of 48-core fiber optic cabling for smart buildings

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

48-core fiber optic cables currently range from approximately $0. 30 to $1. 50 per foot, depending on type, jacket, and installation requirements.

Pricing Overview

For bulk multimode 48-core fiber optic cables, such as Corning ClearCurve® OM3, 2000-foot drums suitable for indoor/outdoor riser-rated installations, prices typically fall in the range of $0. 30 to $1. 00 per foot depending on supplier and specifications (e.g., water-blocking, PVC jacket, Riser or Plenum rating).

Retail and online marketplaces, such as Alibaba, list 48-core fiber optic cables per meter with prices varying based on single-mode or multimode, jacket type (PE, LSZH), and certification standards. For specialized cables like Micro Armor Indoor/Outdoor plenum-rated 48-strand fiber, which are crush and rodent resistant and suitable for multi-floor smart building backbones, prices are higher due to advanced construction, but they reduce overall installation costs by eliminating the need for additional conduit.

Cost Factors

Fiber Type: Multimode (OM3/OM4) is generally more expensive per foot than single-mode fiber, but single-mode requires costlier transceivers. Cable Construction: Indoor riser-rated cables are cheaper than plenum-rated or armored cables. Armored or micro-armor cables increase material cost but improve durability and installation efficiency.

Installation Environment: Indoor, outdoor, or mixed-use cables affect pricing. Indoor/outdoor rated cables with water-blocking and UV-resistant jackets are priced higher. Quantity: Bulk purchases (drums of 2000 feet or more) reduce per-foot costs by 20–40% compared to small retail quantities.

Typical Price Ranges

Standard 48-core multimode OM3 indoor/outdoor riser cable: $0. 30–$1. 00 per foot Plenum-rated or armored 48-core cables: $0.

80–$1. 50 per foot, depending on flexibility, micro-armor design, and environmental protection Wholesale bulk pricing: Can be lower, around $0. 09–$0.

50 per foot for large commercial orders SummaryFor smart building applications, 48-core fiber optic cables suitable for multi-floor backbones or intra-building networks are available in a range of prices depending on fiber type, jacket, and protective features. Multimode OM3/OM4 cables are common for 10Gbit short-range applications, while armored or plenum-rated cables are preferred for flexible, durable installations. Bulk purchasing and careful selection of cable type can optimize both material and installation costs.
