400G Optical Module Low Noise Three-Year Warranty

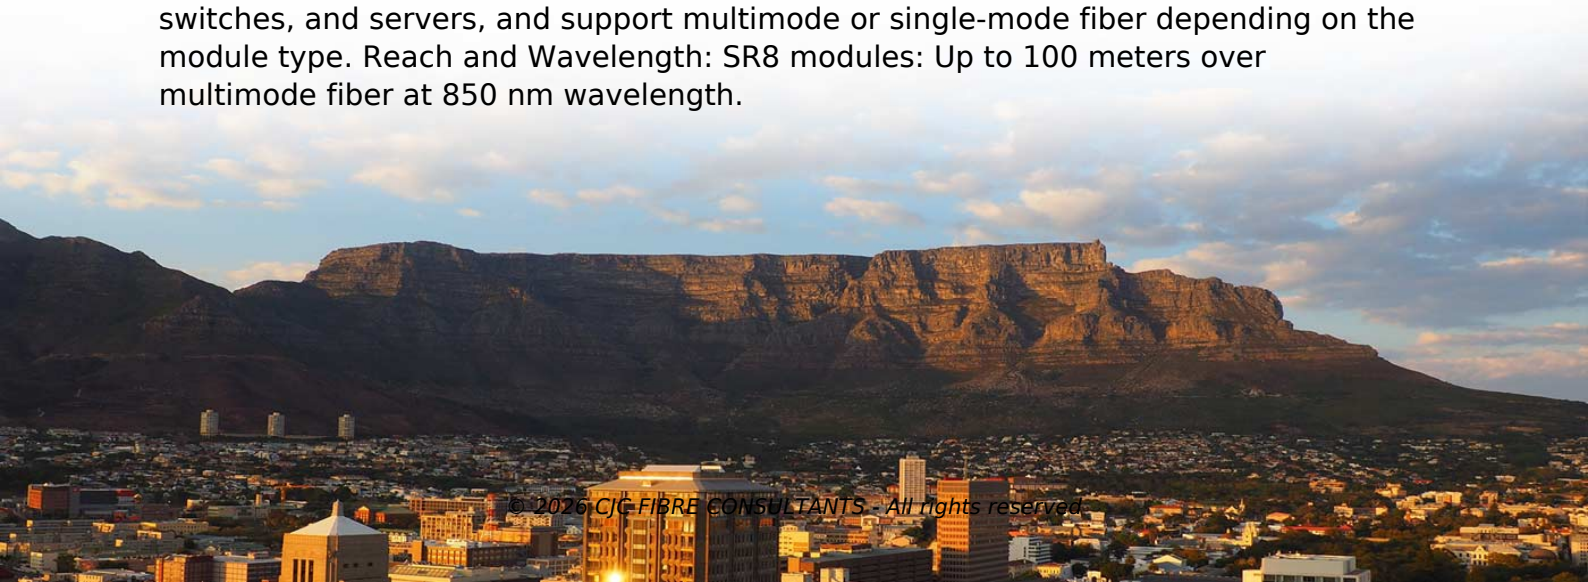

Overview

The Cisco''s QDD-400G-VR4 Module (Figure 5) is a hot pluggable optical transceiver compliant with 400G Ethernet.

Key Takeaways

400G QSFP-DD optical modules with low noise are available with three-year warranties, offering high-speed, reliable connectivity for data centers and telecom networks. Key FeaturesHigh-Speed Connectivity: 400G optical modules, such as QSFP-DD SR8 and LR4 types, support 400Gbps data rates, enabling ultra-high-capacity links for data centers, cloud networks, and telecom infrastructure (Tripp Lite, ETU-Link). Low Noise Performance: Many 400G modules, including coherent optics variants, are designed for low optical signal-to-noise ratio (OSNR) degradation, ensuring stable transmission over long distances and high-density network environments (Coherent, Cisco).

Form Factor and Compatibility: QSFP-DD modules feature a double-density pluggable interface with hot-swappable capability, allowing easy installation without network downtime. They are MSA-compliant, compatible with a wide range of routers, switches, and servers, and support multimode or single-mode fiber depending on the module type. Reach and Wavelength: SR8 modules: Up to 100 meters over multimode fiber at 850 nm wavelength.

LR4 modules: Up to 10 km over single-mode fiber at 1310 nm wavelength. Coherent modules: Support ultra-long-haul DWDM networks with C-band or L-band operation, suitable for regional or long-distance links. Digital Diagnostic Monitoring (DDM): Real-time monitoring of temperature, input/output power, and supply voltage ensures operational reliability and helps maintain low-noise performance.

Warranty and Support: Many 400G optical modules come with a three-year limited manufacturer's warranty, providing coverage for defects and technical support. Some vendors, like Carritech Optics, even offer lifetime warranty options for certain 400G transceivers. Applications: Ideal for data centers, cloud networks, FTTX, SDH/SONET, and high-capacity enterprise networks, these modules support 400G Ethernet and InfiniBand HDR data rates, ensuring robust, low-latency connectivity.

Summary

For users seeking low-noise 400G optical modules with a three-year warranty, options include: Tripp Lite 400GBASE-SR8 QSFP-DD: Hot-swappable, DDM-supported, 100m reach, 3-year warranty. ETU-Link 400G QSFP-DD LR4: 10 km reach, robust diagnostics, 3-year warranty. Cisco 400G QSFP-DD Ultra Long-Haul Coherent: Low-noise, long-distance DWDM, MSA-compliant.

These modules provide high reliability, low noise, and long-term support, making them suitable for mission-critical networking environments.
