Italian cable tray bending equipment

Overview

Schiavetti Tekno is the production unit dedicated to standard and tailor-made cable trays and accessories.

Key Takeaways

Italy offers high-precision, customizable cable tray and tube bending machines from manufacturers like Macri Italia, Comac, and Spina Group, designed for industrial efficiency and durability.

Key Italian Manufacturers

Macri Italia specializes in electric tube bending machines made entirely of steel, offering 1 to 12 axes machines with clockwise and anticlockwise bending. Their CNC-controlled machines are highly versatile, suitable for hydraulic connections, petrol pipes, and other industrial applications, and can be tailored to specific customer requirements. Comac produces profile and section bending machines with over 35 years of experience.

Their machines are designed for high accuracy, repeatability, and minimal maintenance, making them suitable for long-term industrial use. Spina Group focuses on integrated production solutions, including cable trays and accessories. Their Schiavetti Tekno line offers standard and tailor-made cable trays with UL certification and compliance with NEMA standards, ensuring high-quality Italian manufacturing.

Features of Italian Cable Tray Bending MachinesCNC Precision: Machines often include CNC systems for accurate mold positioning and consistent bending results. Automation: Many machines support automatic cutting, stacking, and batch production, improving efficiency and reducing labor costs. Versatility: Capable of bending various types of cable trays, including ladder and perforated trays, as well as tubes and profiles for industrial applications.

Durability: Built with high-quality steel and engineered for long-term use with minimal maintenance. Customization: Machines can be configured with multiple axes, software options, and tooling to meet specific production needs.

Applications

Italian cable tray bending equipment is widely used in electrical, construction, and industrial sectors, supporting the production of cable trays, piping systems, and structural profiles. These machines are ideal for manufacturers seeking precision, efficiency, and compliance with international standards. For sourcing, companies like Macri Italia, Comac, and Spina Group provide direct sales and custom solutions, ensuring that equipment meets both production and regulatory requirements.
