Our high and low voltage complete electrical equipment solutions are designed based on a deep understanding of the current development trends in the power industry and accurate predictions of future power demand. This solution covers a complete set of power equipment from low-voltage distribution. Low voltage equipment powers homes, businesses, and industries safely and efficiently, operating under 50 volts in the U. or up to 1,000 volts AC globally. It reduces risks like electrical shocks and fires while enabling smart technologies to cut energy use by up to 33%. GHS168 is our company absorbing foreign technology and developed the design of the low-voltage drawer-type switch equipment. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems.
