New Zealand Plastic Tail Trough Companies

Overview

Troughs, stock water storage & supply | RX Plastics NZRX Plastics troughs provide protection on the lead-in pipe to the ballcock and is protected from rubb.

Key Takeaways

Key suppliers of plastic stock watering troughs in New Zealand include Kiwitech International, Hynds Pipe Systems, NZ Farm Source, Stallion, and Farmlands.

Major Suppliers and Offerings

Kiwitech International specializes in super-tough portable and fixed stock watering troughs designed for intensive grazing systems. Their troughs can service 50–100 adult cattle and are compatible with Kiwitech Hydrants for easy connection and disconnection. They offer durable designs suitable for cattle, deer, horses, and pigs, with options for daisy-chaining multiple troughs for larger herds.

Hynds Pipe Systems Ltd. provides a wide range of polyethylene troughs in rectangular and circular shapes, suitable for small lifestyle blocks to large multi-farm operations. Their products include trough fittings, floats, and ballcocks, with lightweight designs and rounded edges to protect livestock.

N

Z Farm Source offers plastic and concrete troughs ranging from 150L to 1500L. They supply portable and static troughs in round, square, rectangular, and oblong shapes, catering to various farm sizes and livestock types. Stallion manufactures rotationally moulded plastic products, including water troughs, tanks, and feeders.

They focus on innovative designs for ease of use, such as open troughs for better cleaning and monitoring. Stallion has been a trusted supplier of agricultural products in New Zealand since 1984. Farmlands is New Zealand's largest farmer-owned rural supplies co-operative, offering a wide selection of plastic troughs online with delivery or pick-up options.

Their range caters to different livestock needs and farm sizes. Considerations When Choosing a TroughCapacity: Choose based on herd size; options range from 150L to 1500L. Portability: Portable troughs allow flexibility in rotational grazing systems.

Material: Rotationally moulded polyethylene is durable and safe for livestock. Accessories: Consider floats, ballcocks, and fittings for water regulation. Livestock Type: Some troughs are better suited for cattle, while others are designed for sheep, deer, or horses.

These suppliers provide a comprehensive selection of plastic troughs suitable for New Zealand farms, ensuring durability, ease of use, and compatibility with various livestock watering systems.
