OPGW optical cable for sale at a high price

Overview

About OPGW Cable: Definition and Typical Use Cases OPGW (Optical Ground Wire) is not just another fiber optic cable.

Key Takeaways

The on-site price of OPGW cables ranges from approximately ₹11 per meter to RMB 30,000 per kilometer, depending on fiber count, material, and supplier.

Price Overview

The cost of OPGW (Optical Fiber Composite Overhead Ground Wire) cables varies significantly based on fiber core count, material composition, and structural specifications. For example, in China, a 24-core OPGW cable is priced around RMB 15,000 per kilometer, while a 72-core cable can reach RMB 30,000 per kilometer or more. In India, suppliers offer prices starting from ₹11 per meter for basic models, with higher-end cables reaching ₹65 per meter depending on the brand and specifications.

Factors Affecting Price

Fiber Core Count: More cores increase the cost due to higher material usage and transmission capacity. Material Composition: Aluminum, steel, or composite materials affect durability, conductivity, and price. Cable Structure: Single-layer vs. multi-layer designs, armored vs. unarmored, and anti-lightning features influence cost.

Order Size and Supplier: Bulk orders often receive discounts, and prices vary between suppliers and regions. Application Requirements: High-voltage transmission lines or harsh environmental conditions may require specialized OPGW cables, increasing the price.

Procurement Tips

Request multiple quotes from suppliers to ensure competitive pricing. Specify project requirements clearly, including fiber count, voltage rating, and environmental conditions. Consider total project cost, including installation, monitoring systems, and maintenance, not just cable price.

By understanding these factors, buyers can make informed decisions and align OPGW cable purchases with project budgets and technical requirements.
