ASEAN APC Integrated Data Center Micro-Module Brand

Overview

Micro Data Center Delta's modular datacenter solution offers a datacenter environment that provides safe equipment operations within the racks, and support.

Key Takeaways

APC by Schneider Electric offers micro data center solutions that provide reliable, secure, and integrated power and IT infrastructure for edge and small-scale deployments in ASEAN.

Overview of AP

C Micro Data CentersAPC micro data centers are all-in-one enclosures designed to deliver the reliability, resiliency, and security of traditional data centers in a compact form factor suitable for edge environments, home offices, or small businesses. These solutions integrate power protection, cooling, and monitoring systems to ensure continuous operation of critical IT equipment, including servers, networking devices, and storage. Key features include: Guaranteed power protection for computers and network devicesIntegrated UPS systems to prevent downtimeIntelligent monitoring for environmental conditions and energy usagePlug-and-play deployment for rapid installation and minimal setupSupport for small-scale IT loads, making them ideal for regional or micro data center applicationsApplications in ASEANWith the ASEAN digital economy rapidly expanding, micro data centers are increasingly important for supporting cloud computing, IoT, AI, and fintech applications.

C micro-module solutions are particularly suitable for: Edge computing sites where space is limitedSmall business IT infrastructure requiring high availabilityRemote or regional deployments where quick installation and modular expansion are neededComparison with Other ASEAN Micro-Module SolutionsOther brands in the ASEAN region also offer modular micro data centers: Delta InfraSuite: Rack-based modular solution integrating UPS, cooling, power distribution, and intelligent monitoring, suitable for IT loads under 20kVA and spaces under 50 m². Sunsea SDC300-M: Prefabricated, modular solution with high-density racks, closed aisle cooling, intelligent monitoring, and scalable power from 1kW to 16kW, achieving PUE as low as 1.

3.

AP

C solutions differentiate themselves with Schneider Electric's global support network, certified power protection, and a focus on edge and small-scale deployments, making them a reliable choice for ASEAN micro data center projects.

Conclusion

For organizations in ASEAN seeking compact, reliable, and intelligent micro data center solutions, APC by Schneider Electric provides a robust option with integrated power, cooling, and monitoring systems. These solutions are ideal for edge computing, small business IT infrastructure, and rapid deployment scenarios, complementing other regional offerings like Delta InfraSuite and Sunsea SDC300-M.
