ASEAN Tray-type Cable Tray Manufacturing

Overview

ORITRAY cable supports systems are manufactured by PT Ori Polytec Composites who is the first manufacturer and market leader in Fiberglass Reinforced Plastics in Indonesia.

Key Takeaways

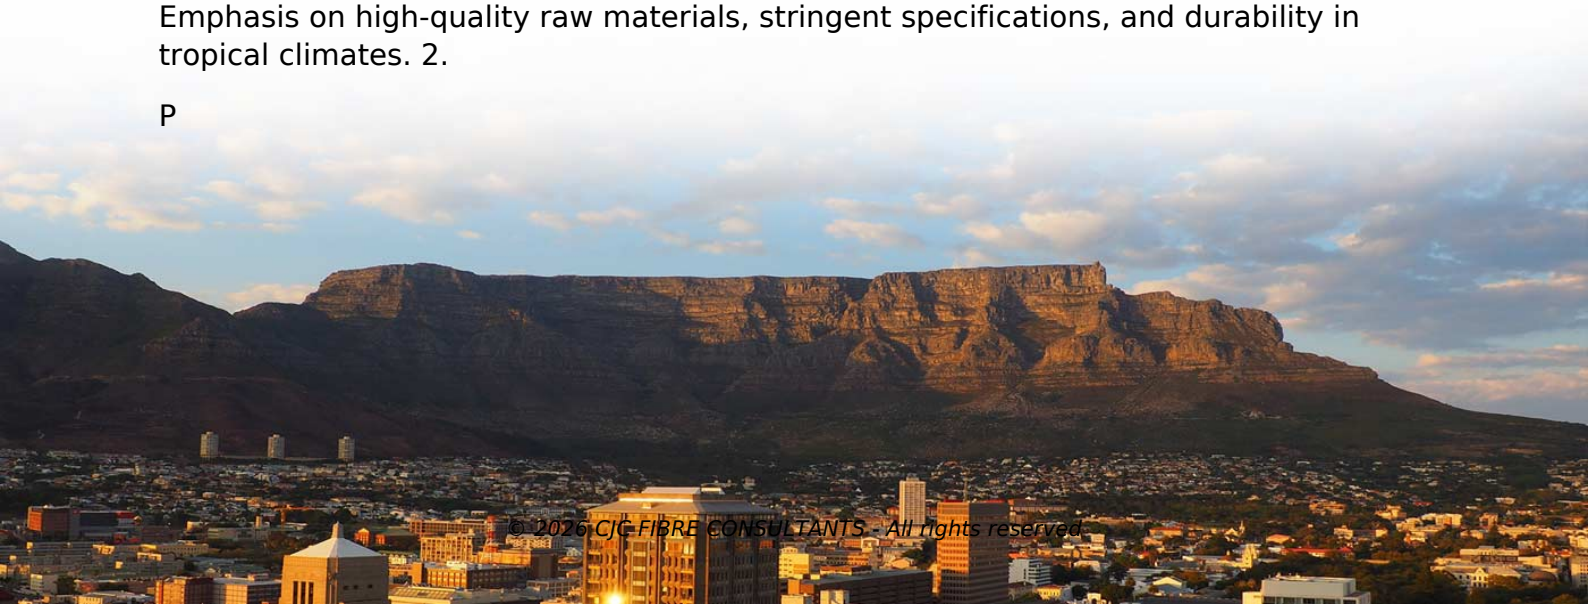

Leading tray-type cable tray manufacturers in ASEAN include PT Ori Polytec Composites (Indonesia), PT Sumber Surya Mandiri (Indonesia), and Array Metal Sdn Bhd (Malaysia), offering steel and fiberglass solutions for industrial and commercial applications. Key Manufacturers in ASEAN1.

P

T Ori Polytec Composites (Indonesia)Specializes in fiberglass reinforced plastic (FRP) cable trays under the ORITRAY brand. Offers channel-type and ladder-type trays, designed for corrosion resistance, fire retardance, and UV protection. Products are widely used in electrical, oil & gas, and industrial sectors.

Emphasis on high-quality raw materials, stringent specifications, and durability in tropical climates. 2.

T Sumber Surya Mandiri (Indonesia)Produces steel cable trays, ladders, and enclosed channels suitable for industrial and commercial installations. Offers heavy-duty and flexible wire mesh trays for efficient heat dissipation and easy installation. Complies with SNI and ISO standards, ensuring quality and reliability for local and international projects.

3. Array Metal Sdn Bhd (Malaysia)Manufactures a wide range of cable trays, ladders, trunking, and wire trays. Focuses on timely delivery, competitive pricing, and international distribution, including Singapore, Australia, and the US.

Products are designed for industrial, commercial, and infrastructure applications, with strong emphasis on quality and reliability.

Product Types and Materials

Tray Types: Ladder-type, channel-type, perforated, and solid-bottom trays. Materials: Galvanized steel, stainless steel, and fiberglass reinforced plastics. Applications: Industrial plants, telecommunications, construction projects, energy facilities, and data centers.

Standards: ISO, CE, and regional standards like SNI in Indonesia, ensuring compliance with safety and durability requirements.

Considerations for Selection

Material choice: Fiberglass trays are ideal for corrosive environments, while steel trays are preferred for structural strength. Load capacity and ventilation: Ladder-type trays allow better airflow for heat dissipation, suitable for high-power cables. Compliance and certifications: Ensure the manufacturer meets ISO, CE, or local standards for safety and quality.

Regional support: Manufacturers with local presence in ASEAN countries can provide installation support and faster delivery. These manufacturers represent some of the most reputable and reliable sources for tray-type cable trays in ASEAN, offering solutions that meet both industrial and commercial requirements.
