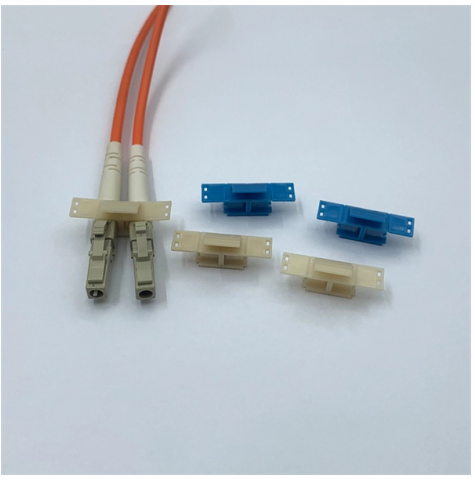
UAE Pre-made Cable Tray Models



Overview

Get high-quality steel cable trays manufactured and supplied in Dubai, UAE. Contact Metar for technical specifications, project pricing, and bulk supply support for your cable management requirements.

Key Takeaways

In the UAE, cable tray models include ladder, perforated, wire mesh (basket), solid bottom, and GRP systems, available in steel, galvanized, powder-coated, and corrosion-resistant finishes. Common Cable Tray Types in the UAE1. Ladder Cable TraysHeavy-duty design with two side rails connected by rungs.

Ideal for industrial facilities, power plants, and outdoor installations. Provides maximum load-bearing capacity and excellent ventilation, preventing cable derating in high temperatures common in the UAE. 2.

Perforated Cable Trays

Bottom tray perforated with slots or holes. Balances support and ventilation, suitable for commercial and light industrial projects. Simplifies cable securing with ties or clips.

3. Wire Mesh (Basket) TraysConstructed from steel wire grids, lightweight and flexible. Best for data centers, server rooms, and low-voltage cabling.

Offers excellent airflow and easy on-site customization. 4. Solid Bottom (Channel) TraysFully enclosed to protect sensitive cables from dust, debris, and electromagnetic interference (EMI).

Suitable for fiber-optic or instrumentation cables, but limited ventilation requires careful derating for power cables. 5.

GR

P (Glass Reinforced Polyester) Cable Management SystemsLightweight (40–50% lighter than metallic trays), highly corrosion-resistant, and immune to electromagnetic interference. No earthing required and minimal heat transfer to cables under sunlight.

Material and Finish Options

Mild Steel: Standard for indoor and general applications.

Pre-

Galvanized Steel: Provides moderate corrosion resistance.

Hot-

Dip Galvanized (HDG) Steel: Ideal for outdoor, coastal, and industrial environments, offering robust protection against corrosion.

Powder-

Coated Steel: Enhances durability and aesthetic finish. Stainless Steel: Used in highly corrosive or chemical environments.

Local Manufacturers and Suppliers

Unigroup: Offers ladder, perforated, wire mesh, and GRP trays manufactured in the UAE with certified load and safety performance. Metar: Supplies steel cable trays in mild steel, pre-galvanized, HDG, and powder-coated finishes, with customization for widths, side rail heights, and load ratings. Ruwais Steel: Provides a wide range of cable trays including ladder, trunking, perforated, HDG, and GI trays, adhering to ISO 9001: 2008 standards.

Applications

Industrial Plants and Power Facilities: Ladder and HDG trays for heavy loads and heat dissipation. Commercial Buildings: Perforated and solid bottom trays for structured cabling.

Data Centers and I

T Infrastructure: Wire mesh trays for airflow and flexible routing. Harsh Environments: GRP or stainless steel trays for chemical resistance and minimal maintenance. By selecting the appropriate tray type, material, and finish, UAE projects can ensure durable, safe, and efficient cable management suitable for extreme heat, coastal humidity, and industrial conditions.
