Key Takeaways

GYTS is a steel tape armored, gel-filled loose tube fiber optic cable designed for outdoor aerial and duct installations, offering high mechanical protection and environmental resistance. Construction and FeaturesGYTS cables are engineered for harsh outdoor environments and consist of several key components: Gel-Filled Loose Tube (T): Optical fibers are housed in gel-filled loose tubes, which are stranded around a central strength member. This design isolates fibers from mechanical stress and moisture, ensuring long-term signal integrity.

Corrugated Steel Tape Armor (S): A longitudinally applied steel tape layer provides superior crush resistance and protection against rodent attacks, making GYTS ideal for high-pressure or rodent-prone areas. Polyethylene Outer Jacket (Y): The black, UV-resistant PE jacket protects the cable from sunlight, abrasion, and harsh weather conditions, extending service life. Central Strength Member: Typically made of steel or FRP, it provides tensile strength for aerial deployment.

ApplicationsGYTS cables are suitable for a variety of outdoor installations: Aerial Installations: Overhead deployment on poles or towers. Duct Installations: Underground or conduit-based networks. Direct Burial: In some cases, for long-haul or metropolitan area networks.

Telecommunications Infrastructure: Backbone networks, access networks, and metropolitan area networks (MANs).

Fiber Types and Capacity

Supports single-mode fibers (G. 652D, G. 657A1/A2) and multimode fibers (OM1, OM2, OM3, OM4) from leading brands.

Fiber counts range from 2 cores up to 432 cores, allowing flexible deployment for small to large-scale projects.

Advantages

Mechanical Protection: Steel tape armor resists crushing and rodent damage. Moisture Resistance: Gel-filled tubes prevent water ingress.

U

V and Weather Resistance: PE jacket ensures durability in outdoor conditions. Customizable: Fiber count, sheath material, and length can be tailored for specific project requirements. Comparison with Other Outdoor CablesADSS: All-dielectric self-supporting cable, no metallic components, suitable for aerial spans without additional support.

GYT

A: Aluminum-armored cable, less crush-resistant than GYTS. GYXTW/GYTC8S: Variants with steel tape or figure-8 self-supporting designs for aerial deployment. In summary, GYTS cables are robust, armored fiber optic solutions optimized for aerial and duct installations, providing excellent mechanical protection, environmental resistance, and flexibility for large-scale outdoor network deployments.

GYTS/GYTA Duct Steel Tape Dry Core Fiber Optic Cable

1,Only a part of Aerial/Duct/Direct Buried/Underground/Armoured cables are listed in the table. Cables with other specifications can be inquired.2,Cables can be supplied with a range of single mode or

Stranded Loose Tube Light-armored Fiber Optical

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

GYTA is an outdoor use optical fiber cable suitable for duct and aerial applications. We supply GYTA fiber optic cable from 2 fiber cores to 288

GYTS vs. GYTA Fiber Optic Cables: Key Differences

This guide breaks down the differences between GYTS and GYTA cables, helping engineers, contractors, and network planners make informed

Ribbon Optical Cable | High-Density Outdoor Fiber Cable for

Need high-density fiber cabling? Compare ribbon optical cable types like GYDTA, GYDXTW, and GYDGA. Learn how to select the right armored or dielectric cable for your application.

GYTS Armored Fiber Optic Cable | Wholesale Duct & Aerial

Source GYTS armored fiber optic cable direct from our factory. With steel tape armor and a PE jacket, it''s ideal for harsh aerial and duct environments. Contact us for bulk pricing.

GYTS / GYTA FIBER OPTICAL CABLE – Electrical

The Standard Loose Tube Light Armored Cable, or GYTS cable for short, is a type of outdoor fiber optic cable designed for aerial, duct, and direct buried applications.

Complete Guide to GYTS/GYTA Cables for Seamless Communication

Stranded Loose Tube Light-armored Cable (GYTS/GYTA) is a reliable and high-performance solution for fiber optic communication. These cables provide exceptional connectivity and data transmission in

Outdoor Fiber Optic Cable — Aerial, Duct, Burial | TTI

Outdoor Fiber Optic Cable Built to Endure ADSS, GYXTW, GYTA, armored, and air-blown cables — 2 to 288 cores for aerial, duct, and direct burial.

Overview to Aerial Fiber Optic Cables: What You Should Know

Fiber optic aerial cables are used in telecommunication networks that are installed on poles, towers, or other structures above the ground. Aerial fiber optic networks are designed to

Aerial Fiber Optic Cable

Aerial Fiber Optical Cable Types Based on the installation method, we can classify aerial optical cables into self-supporting aerial fiber optic cables and catenary wire aerial fiber optical cables. Self

Step By Step Instructions How To Install Aerial Fiber Optical Cables ...

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Essentially, there are four crucial steps to installing aerial optical cables correctly: knowing the tools and materials, the installation hardware, optical cable reservation and FAT installation.

Aerial Fiber Optic Cables Tutorial

Aerial fiber cables are mainly used for secondary trunk level and below. This article introduces aerial fiber optic cable''s definition, types and installation tips.

Aerial cable

Aerial cable for voltages up to 69,000 volts has also been built, for the supply of farms, waterworks, transmitters and other facilities outside of urban areas. Aerial cables are not often used in

Aerial Fiber Optic Cable Overview and Installation Guide

In addition, aerial fiber optic cable resists environmental concerns such as ever-changing weather conditions in the form of excess heat and moisture and

Aerial Fiber Optic Cables | OPTRAL

We offer loose fiber optic cables for aerial installations and high fiber density. Available with single or double sheath.

Outdoor Fiber Optic Cable

GYXTC8S Fiber Optic Cable (Aerial) Outdoor fiber optic cables are made to protect the optical fiber to operate safely in complicated outdoor environment. Most outdoor fiber cables are loose buffer

Fibre to the Home Aerial cables in FTTH

1. Introduction The installation of optical aerial cables is increasingly used in FTTH roll out. The main reasons are to achieve a lower initial CAPEX and a faster installation practice than buried or duct
