# Bhutan busbar rivet price

## Overview

market price collected from the four base towns of Gelephu, Phuentsholing, Samdrup Jongkhar, and Thimphu.

## Key Takeaways

Busbar rivet prices in Bhutan are not fixed publicly, but reference rates and international supplier prices suggest a range of approximately $0. 10–$1 per piece depending on size, material, and quantity.

### Reference Pricing and Guidance

The Bhutan Schedule of Rates (BSR) provides suggestive average prices for construction and electrical materials, including busbar components, but it does not list exact current market prices for busbar rivets. These rates are intended for guidance and may differ from actual supplier prices. International suppliers such as Alibaba and Suzhou Kiande Electric Co., Ltd. offer busbar rivets for hydraulic self-piercing riveting machines, with prices varying based on size, material, and order quantity.

Bulk orders (thousands of pieces) typically reduce the per-unit cost. Local Bhutanese suppliers like Parop Trader provide busbar systems, panels, and accessories, including rivets, but specific pricing is usually available upon request or through direct quotation. This is common for industrial electrical components in Bhutan.

### Practical Tips for Procurement

Contact local suppliers directly: For accurate pricing, reach out to companies like Parop Trader or other electrical distributors in Bhutan. Consider bulk orders: International suppliers often offer lower per-unit prices for large quantities, which may be cost-effective if importing. Check material specifications: Rivet prices vary depending on whether they are copper, aluminum, or alloy, and whether they are compatible with hydraulic riveting machines.

### Use BS

R as a reference: While not exact, the BSR can help estimate costs for budgeting purposes. In summary, while there is no publicly listed fixed price for busbar rivets in Bhutan, expect a range of $0. 10–$1 per piece, with actual prices depending on supplier, material, and order size.

Direct inquiries to local distributors or international suppliers are recommended for precise quotations.
