Botswana Galvanized Cable Tray Specifications and Models

Overview

Galvanized Cable Tray In BotswanaWhat are Galvanized Cable Trays?

They are a type of cable support system manufactured from steel sheets coated with a zinc.

Key Takeaways

Galvanized cable trays in Botswana are made from hot-dip galvanized steel, offering high corrosion resistance, durability, and efficient cable management for industrial and commercial applications.

Material and Coating

Galvanized cable trays in Botswana are typically manufactured from high-grade steel sheets coated with a zinc layer through hot-dip galvanization, which provides exceptional protection against rust and corrosion, making them suitable for harsh environments. Some trays may also be available in pre-galvanized or powder-coated finishes for additional protection.

Design and Construction

Perforated or ventilated bottoms allow for proper airflow, preventing cable overheating and ensuring optimal system performance. Ladder and ventilated tray designs are common, providing structural strength and easy cable installation. Trays are available in various sizes, shapes, and load capacities, tailored to project requirements.

The construction ensures resistance to impact, wear, and deformation, supporting heavy cable loads over long spans.

Standards and Compliance

Botswana galvanized cable trays are designed to meet international standards such as ASTM A123, ISO 1461, NEMA VE 1-2017, and ANSI/NFPA 70 (National Electrical Code). These standards ensure structural integrity, safety, and compatibility with electrical installations.

Installation and Applications

Trays are easy to install, often without specialized tools, reducing labor costs. Suitable for power, data, and audio-visual cabling in industrial plants, commercial buildings, and infrastructure projects. Can be used in indoor and outdoor environments, including areas exposed to moisture or corrosive conditions.

Suppliers in Botswana

Leading suppliers and manufacturers include Brilltech Engineers and Jeetmull Jaichandlall (P) Ltd., offering custom sizes, high-quality finishes, and export options. They provide technical support, CAD drawings, and guidance for project-specific requirements. In summary, galvanized cable trays in Botswana are durable, corrosion-resistant, and versatile, meeting international standards and suitable for a wide range of electrical and industrial applications.

They are available in multiple designs and finishes to accommodate different load requirements and installation environments.
