Cable management frame price

Overview

"cable management frame" Check out the list of 2026 newest cable management frame manufacturers above and compare similar choices like network rack, fiber.

Key Takeaways

Cable management frames typically cost between $20 and $85 per unit, depending on type and design.

Typical Pricing

Conventional 1U Horizontal Cable Managers usually cost around $38 per unit, with the average cable management cost per U space in a server rack being approximately $84. 73.

Zero-

U Cable Management Shelves, which do not occupy additional rack space, are more cost-effective at about $21 per unit, often including accessories like Velcro straps. Cable Trays, used for larger-scale or industrial installations, vary widely based on material (galvanized steel, aluminum, stainless steel), size, and load capacity. Prices are influenced by modularity, installation ease, and environmental factors such as corrosion resistance or fire safety.

Factors Affecting Cost

Material and Build Quality: Steel or aluminum frames are common; higher-grade materials increase durability and cost. Design Type: Horizontal, vertical, or zero-U designs affect both price and rack space usage. Installation Complexity: Labor costs can add significantly, especially in older buildings or complex layouts.

Accessories: Straps, brackets, and fittings may be included or sold separately, impacting total cost. Project Scale: Bulk purchases or large data center deployments can reduce per-unit costs due to economies of scale.

Summary

For most IT or data center applications, expect to pay $20–$85 per cable management frame, with zero-U options being the most economical and conventional 1U managers at the higher end. Cable trays and specialized industrial frames may cost more depending on material, size, and installation requirements. Proper planning and selection can optimize both cost and rack space efficiency.
