Cable tray fireproof cover manufacturer

Overview

Fire protection for cables & cable trays | FlamroFire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coat.

Key Takeaways

Fireproof cable trays are available from specialized manufacturers offering materials like stainless steel, galvanized steel, aluminum, fiberglass, and intumescent-coated solutions to ensure fire resistance and compliance with safety standards. Leading Manufacturers and SuppliersNewReach – Offers fire-rated cable trays designed to maintain structural integrity during fires, preventing flame spread and supporting critical systems like emergency lighting and fire alarms. Materials include powder-coated aluminum, galvanized steel, and fiberglass with intumescent coatings.

Their trays meet international standards such as ISO 834-1, EN 1363-1, DIN 4102-12, and AS/NZS 3013: 2005, with fire ratings up to 2 hours at 1050°C. Flamro – Provides fire protection coatings and tapes such as FLAMMOTECT-A and DG-CR 0. 7, forming protective shields around cables and trays.

These solutions are suitable for indoor and outdoor use in industrial plants, substations, and public buildings, enhancing resistance to environmental hazards while preventing flame propagation. Chinese Manufacturers via Made-in-China and Alibaba – Offer a wide range of fireproof cable trays including FRP, fiberglass, GRP, stainless steel, aluminum alloy, and galvanized steel. Products include ladder trays, wire mesh trays, perforated trays, and compact busway solutions.

Many suppliers provide OEM/ODM services, custom lengths, and high-strength designs suitable for industrial, commercial, and server room installations.

Key Features to Consider

Materials: Stainless steel and fiberglass offer superior fire and corrosion resistance; galvanized steel and aluminum are lightweight and durable. Fire Ratings: Look for trays tested to UL 1724, NFPA 70, ISO 834-1, or equivalent standards. Coatings: Intumescent paints or fire-resistant powder coatings expand under heat to insulate cables and delay fire spread.

Design Types: Ladder trays, perforated trays, wire mesh trays, and trough trays provide flexibility for different cable loads and installation environments. Applications: Suitable for server rooms, chemical plants, industrial facilities, power plants, and public infrastructure.

Recommendations

When selecting a fireproof cable tray manufacturer, consider: Compliance with local and international fire safety standards. Material suitability for environmental conditions (corrosion, UV, chemical exposure). Load capacity and span requirements.

Availability of custom sizes and coatings for enhanced fire protection. These manufacturers and suppliers provide reliable solutions to ensure cable safety, uninterrupted operation of critical systems, and compliance with fire regulations.
