Cable tray fireproofing costs

Overview

Fire protection for cables & cable trays | FlamroFire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coat.

Key Takeaways

Fireproof cable tray prices vary widely, typically ranging from $0. 32 to $12 per unit for materials, with total installed costs influenced by material type, fireproofing method, and labor.

Material and Price Overview

The cost of fireproof cable trays depends heavily on the material and fireproofing treatment. Common options include: Carbon steel trays: Often coated with galvanization or intumescent fireproofing, capable of withstanding temperatures above 1000°C for 90–120 minutes. Prices start at around $0.

32 per unit and can go up to $12 depending on size and coating complexity. Stainless steel trays (304/316): Naturally fire-resistant and highly durable, suitable for harsh environments like chemical plants or coastal areas. These are more expensive initially but reduce long-term maintenance costs.

Aluminum trays: Lightweight and corrosion-resistant, moderately priced.

FR

P (Fiberglass-Reinforced Polyester) trays: Non-corrosive, fire-resistant, and low-maintenance, increasingly used in industrial and offshore applications.

FR

P trays are favored for long-term durability and compliance with stricter fire safety codes.

Fireproofing Methods

Fireproofing can be achieved through: Intumescent coatings: Applied to metal trays to enhance flame resistance. Fire protection tapes and bandages: Such as FLAMMOTECT-A or DG-CR 0. 7, which protect cables and maintain functionality during fire events.

Inherent material resistance: Stainless steel and FRP provide fire resistance without additional coatings.

Installation and Total Cost Considerations

The total installed cost includes: Tray material and fireproofing treatmentSupports, fittings, and accessoriesLabor for installationLong-term maintenance and replacement costs For example, hot-dip galvanized ladder-type trays are priced per 2. 4-meter section, with fittings priced per unit.

Factory-direct or OE

M options can reduce costs, especially for bulk orders.

FR

P trays, while more expensive upfront, offer lower maintenance and longer lifespan, which can reduce total cost of ownership.

Key Factors Affecting Price

Load capacity and span length: Heavier cable loads require stronger, more expensive trays. Environmental conditions: Corrosive or offshore environments favor FRP or stainless steel. Compliance with fire safety standards: UL 1724, BS 476, ASTM E84, and local building codes.

Customization and supplier support: Custom cutting, fabrication, and technical support can influence cost. In summary, fireproof cable tray construction costs vary widely based on material, fireproofing method, and installation complexity. For budgeting, expect material costs from $0.

32 to $12 per unit, with total installed costs significantly higher when including labor, supports, and compliance requirements.

Fire protection for cables & cable trays | Flamro

Fire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coatings and fire protection bandages!

Technical Guidelines for Cable Tray Installation and

1. Route Planning and Layout Principles Coordinate with Building Structure: Cable tray routing should align with architectural design, avoiding unnecessary

Firestop

Our premium, intumescent latex/water-based caulk. This is an affordable firestop caulk that helps you stay on budget. Its unique intumescent property allows IC 15WB Caulk to effectively contain fire and

Fireproof pillow for cable tray penetrations

The product is certified for "small" - "medium" and "large" cable penetrations, to create a fireproof seal for cables with a diameter of up to 21 mm ("small") with a sealing depth of 120 mm even on non

Trunking and cable tray protection

Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.

2026 Top Fireproof Cable Tray Buy Wholesale Price Guide for Buyers

Fireproof Cable Trays aren''t just about keeping wires in check — they actually help cut down on fire hazards and make commercial and industrial spaces safer. Come 2026, folks shopping

Fireproof Cable Tray Enclosures: Keep Cabling Systems Safe

We design custom cable enclosures that protect against fire & blasts. Cost-effective protection with quick installation and NEC & NFPA compliant solutions

Fire resistant cable tray | Hermi-solutions

Cable trays are intended for the construction of fire-resistant cable paths. Do you need help with your purchase? The HERMI team will be happy to advise you and help you find the most suitable solution
