These often include pre-cabling and post-cabling inspection stages, material receiving reports, and trunking installation checks. Inspection Test Plan (ITP): A structured ITP includes inspection/test descriptions, production stages, reference documents, execution procedures, and records documentation for cable trays and accessories. Field Inspection Forms: Detailed forms cover installation neatness, support type and spacing, conduit bending radius, grounding, sealing, and fire-stopping compliance.

### Best Practices

Prepare inspection tools in advance (calipers, torque wrenches, ultrasonic detectors)Cross-check with design blueprints and specifications before inspectionDocument all deviations and corrective actions clearlyMaintain a consistent format for all inspections to ensure traceability and compliance Using these models ensures safety, reliability, and adherence to industry standards while providing a clear record of cable tray installation quality.
