Core Switches and Stacks

Overview

Stackable switches are connected via DAC cables, optical transceivers or specialized stack cables. Stack master is the core switch to manage other stack members and it stores the running configuration files for the. Stacking: Stacking allows multiple physical switches to connect and operate as a single, unified logical switch for simplified management and scalability. This method is applicable on access layer switches. Not all network switches support stacking, it depends on different brands. I would suggest to Look Cat 9300 (cat 3850 going to be end of life soon - you may negotiate nicely so you may have same price of 3850 with Cat 9300 switches?

) You can have combination of Cat 9300 for Layer 2 and core (kind of) and Cat 9200.
