Cost-effective pluggable optical module PAM4

Overview

PAM4 is an optical modulation technique that allows for higher data rates and increased spectral efficiency compared to NRZ.

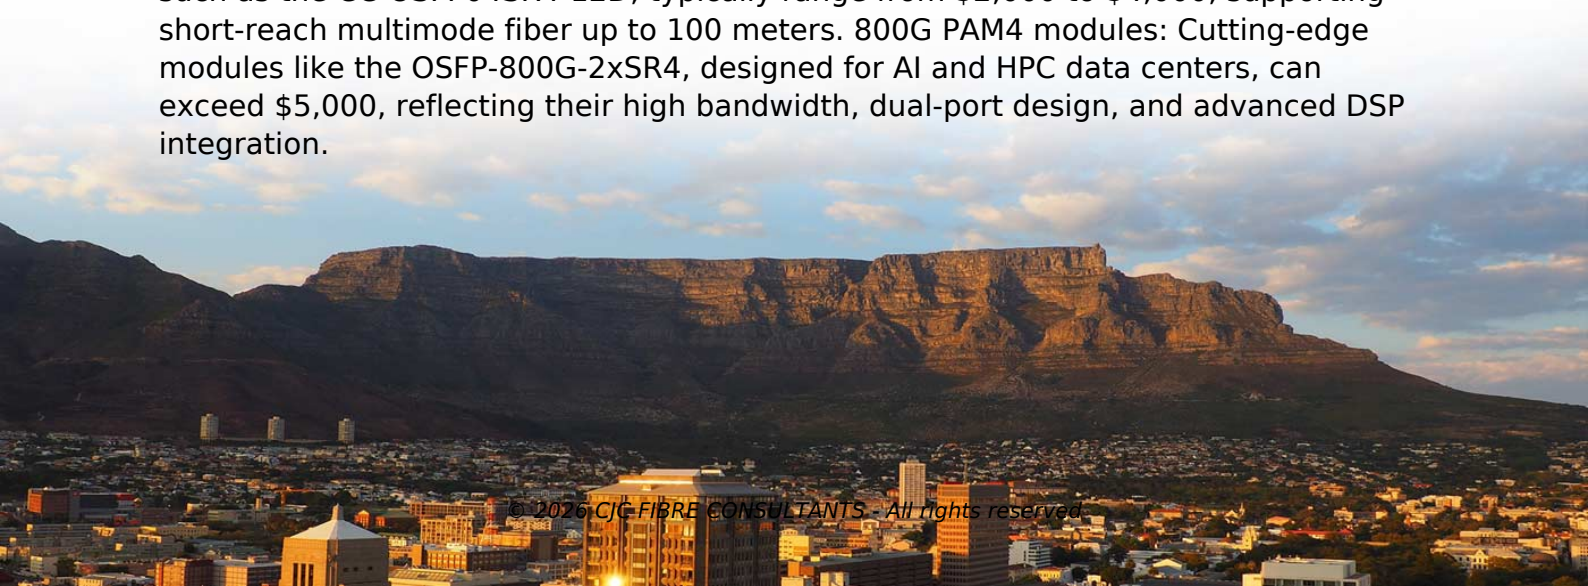

Key Takeaways

PAM4 pluggable optical modules typically range from $500 to over $5,000 depending on speed, reach, and form factor.

Typical Price Ranges100

G PAM4 QSFP28 modules: Usually priced between $500 and $1,500 for standard distances up to 80 km over single-mode fiber, such as the DWDM-100G-Q28-120 module supporting 103. 125 Gbps with PAM4 encoding. 200G PAM4 modules: Modules like the Amphenol QEPT 200G PAM4, which aggregate 200 Gbps over 4 channels, generally cost $1,000 to $2,500, depending on reach and operating temperature.

400G PAM4 OSFP modules: High-speed 400G OSFP modules using PAM4 technology, such as the CC-OSFP04SR4-12D, typically range from $2,000 to $4,000, supporting short-reach multimode fiber up to 100 meters. 800G PAM4 modules: Cutting-edge modules like the OSFP-800G-2xSR4, designed for AI and HPC data centers, can exceed $5,000, reflecting their high bandwidth, dual-port design, and advanced DSP integration.

Factors Affecting Price

Data Rate and Channels: Higher aggregate speeds (400G, 800G) and multi-channel designs increase cost. Reach and Fiber Type: Long-haul single-mode modules with DWDM support are more expensive than short-reach multimode modules. Form Factor: QSFP28, OSFP, and OSFP-800G modules differ in size, density, and compatibility, affecting pricing.

DS

P and Laser Technology: Modules with integrated PAM4 DSPs, EML lasers, or VCSEL drivers for high performance and low power consumption are priced higher. Vendor and Warranty: OEM vs. third-party vendors, warranty length, and support services can influence cost.

Summary

While exact prices fluctuate based on vendor, volume, and market conditions, PAM4 pluggable optical modules are a premium component, with 100G modules starting around $500 and 800G modules exceeding $5,000. For precise pricing, contacting distributors or vendors like Amphenol, Marvell, or Edgeoptic is recommended, as they can provide quotes tailored to your network requirements.
