Delivery date 12-core optical splitter

Overview

12 Ports Fiber Splitter Distribution Box for 1X8 Mini ModuleDiscover a wide range of high-quality Fiber Optic Products, including termination 12 Core Fiber.

Key Takeaways

Delivery times for 12-core optical splitter boxes vary by seller, shipping method, and location, typically coordinated to arrive promptly but may be affected by peak periods.

Product Overview

A 12-core optical splitter, often housed in a fiber distribution box, is designed for FTTH and FTTx networks. It integrates splicing, splitting, distribution, storage, and cable connection in a compact, wall-mounted enclosure. These boxes typically support 1: 8 optical splitting, accommodate 12 SC adapters, and are suitable for indoor and outdoor installation with IP65 protection.

Materials are usually ABS plastic, and the boxes include features like anti-theft locks and modular PLC splitter insertion modules for efficient fiber management.

Delivery Considerations

Estimated Delivery: Delivery times depend on the seller's handling time, origin, destination, and shipping service selected. Some platforms, like eBay, note that delivery may vary, especially during peak periods. Coordination: Suppliers aim to coordinate orders to ensure prompt arrival, and some offer free samples for quality testing before bulk purchase.

Shipping Options: Standard shipping, expedited shipping, and international delivery may be available depending on the seller. Handling times and customs clearance can affect the final delivery date. Returns and Warranty: Most 12-core splitter boxes come with a 1–2 year warranty (fiber optic components typically 1 year), and non-human damage is usually covered for replacement.

Recommendations

Confirm the exact shipping method and estimated delivery date with the seller before purchase. Consider local suppliers if rapid delivery is critical. Check for peak season delays or customs processing if ordering internationally.

Ensure the product meets your installation requirements (indoor/outdoor, wall mount, IP rating) to avoid delays in deployment. By coordinating with the supplier and selecting the appropriate shipping option, you can typically expect your 12-core optical splitter to arrive promptly, though exact dates will vary based on location and shipping conditions.
