Different colored pull rings on the optical module

Overview

The color of the small pull tab on an optical module, while seemingly insignificant, hides a wealth of crucial information.

Key Takeaways

The color of an optical module pull ring indicates its wavelength, fiber type, and transmission distance, enabling quick identification and proper deployment.

Overview

Optical module pull rings (or pull tabs) are color-coded to help technicians quickly identify the module's wavelength, compatible fiber type, and transmission distance without removing it from the port. This system is widely used for SFP, SFP+, QSFP, BiDi, and CWDM modules, streamlining installation, maintenance, and troubleshooting in data centers and network environments. Common Color CodesSingle-Mode and Multi-Mode ModulesBlack: 850nm, multimode fiber, short-distance transmission (typically

Article Content

Meaning of Optical Module Pull Tap Colors

The color of the small pull tab on an optical module, while seemingly insignificant, hides a wealth of crucial information. This article sorts out industry standard pull tab coding rules for

The meaning of the optical module with different color pull ring

By quickly identifying light modules through color, engineers can more efficiently complete network upgrades and expansions, reducing the possibility of errors occurring.

How to Identify Optical Transceiver Wavelengths by Pull

This article provides a professional guide on transceiver pull tab color codes by wavelength—spanning SFP, SFP+, CWDM, and BiDi modules—and

Meaning of Optical Module Pull Tap Colors

Optical module pull tab colors serve as a visual language in network operations and maintenance. Their core value lies in simplifying module selection and troubleshooting.

How to Distinguish the Wavelength by the Color of the Pull Ring of the ...

The color of the pull ring corresponding to the wavelength of 850nm is black, the color of the pull ring of 1310nm is blue, the color of the pull ring of 1550nm and 40KM is red, and the color of

Understanding SFP Modules: Wavelength and Color Codes

Each SFP module operates at a specific wavelength, and to avoid confusion, manufacturers use color-coded pull rings for easy identification.

Understanding Transceiver Pull Tab Colors: Wavelengths & Fiber Types

Learn how to identify optical transceivers by pull tab color. This guide explains wavelength, distance, and fiber compatibility for SFP, QSFP, BIDI & CWDM modules.

How to Identify Optical Transceiver Wavelengths by Pull-Tab Color:

In fiber optic networks, accurately identifying the wavelength of an optical transceiver module is essential for ensuring optimal network performance and reliability. One of the most

Distinguish the wavelength by the color of the pull ring

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

10G single fiber optical module wavelength and pull ring color are 1270nm (black), 1330nm (blue), 1490nm (purple), 1550nm (yellow). The above is

Optical Module Pull Tab Colors: The Ultimate Guide to SFP, QSFP,

Optical Module Pull Tab Colors:Complete Guide to SFP, QSFP, and CWDM Coding Description: Decode optical module pull tab colors for SFP, QSFP+, BIDI, and CWDM modules.

How to distinguish the wavelength by the color of the pull ring of the ...

See the table for details: For the CWDM optical module,the color of its pull ring is colorful,with a total of 18 wavelengths.The wavelength band is divided into front wave and back wave,and the front wave is

Meaning of Optical Module Pull Tap Colors

In the complex network world of data centers, optical modules play a crucial role, efficiently converting electrical and optical signals to ensure stable, high-speed data transmission across fiber optic

How to Distinguish the Wavelength by the Color of the Pull Ring of the ...

In order to distinguish optical modules, different manufacturers can distinguish them by their wavelength, transmission distance, packaging, etc. Do you know what other methods to distinguish them? This

How To Identify The Wavelength Of SFP CWDM Optical Module

This blog ETU-LINK will show you how to identify the wavelength of CWDM optical module through the color of the pull ring. We all know that CWDM has a total of 12 wavelengths,with

Understanding SFP Modules: Wavelength and Color Codes

□□ Understanding SFP Optical Modules – Wavelength & Pull Ring Color Codes When working with networking and fiber optics, SFP (Small Form-Factor Pluggable) modules are crucial for connecting ...

maltego/top100Kenglishwords.txt at master

Custom Maltego transforms. Contribute to michenriksen/maltego development by creating an account on GitHub.

How to Identify Optical Transceiver Wavelengths by Pull-Tab Color□

One key method of visual identification is the color of the transceiver''s pull tab, which corresponds to its wavelength. This article provides a professional guide on transceiver pull tab color

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Methods For Distinguishing Optical Module Types

1. Distinguish by the Color of Module Pull Tabs For modules with distinctly different pull tab colors, you can preliminarily identify their types based on relevant industry standards.
