

Dimensions of hanging identification signs for distribution boxes

Overview

A GUIDE TO WHITE PAPER WAREHOUSE SIGNS We cover various types of signs found in a typical warehouse or DC, formats and design alternatives, and common mater.

Key Takeaways

Hanging identification signs for distribution boxes are typically custom-sized, often ranging from 6x4 inches to 12x18 inches, with options for single- or double-sided printing and various mounting methods.

Recommended Sizes and Visibility

Hanging signs in warehouses or distribution centers are generally custom-manufactured to meet visibility and operational requirements. Common dimensions for small to medium distribution box signs range from 6x4 inches to 12x18 inches, depending on the distance from which they need to be read and whether they include barcodes, text, or graphics. Larger signs may be used for high-traffic areas or long-range scanning, while smaller signs are suitable for close-proximity identification.

Mounting and Orientation

Signs can be single-sided or double-sided, and may be mounted using: Chains or cables for ceiling suspension C-hooks or rail systems for hanging from racks or joists Magnets or double-sided tape for metal surfaces or temporary placement Screws or tie-wraps for permanent installation. Signs may also be angled (e.g., 30°, 60°, 90°, or 120°) to improve visibility from different directions, especially in high-stacked or low-ceiling areas.

Material and Durability

For long-term use, signs are often made from durable materials such as anodized aluminum or rigid plastic, with UV-resistant graphics to prevent fading. Retroreflective materials are recommended for areas requiring long-range scanning or barcode readability.

Customization Considerations

Data integration: Include barcodes, color coding, or variable data for warehouse management systems. Orientation: Horizontal or vertical printing depending on space and line-of-sight. Professional installation: Ensures proper alignment, secure mounting, and compliance with safety standards.

In summary, while there is no single standard size, hanging identification signs for distribution boxes are typically custom-sized between 6x4 inches and 12x18 inches, with mounting, material, and printing options tailored to the warehouse layout, visibility requirements, and operational workflow.
