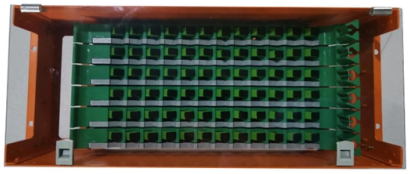
East Africa AC DC Integrated UPS Power Supply Specifications



Overview

Catalog UPSFor over 50 years, AEC has specialized in the manufacturing of uninterruptible power supply (UPS) systems designed to safeguard the power supply.

Key Takeaways

AC/DC integrated UPS systems provide reliable backup power with built-in battery management, supporting both AC and DC loads, and are designed for industrial and critical applications.

Key Features

Input and Output: AC input: Typically 110–120V single-phase for small UPS units, with auto-sensing frequency 50/60Hz (LUMINA series) or standard AC mains input for industrial models.

D

C output: Configurable 24V, 30V, or 60V depending on the model, with maximum output currents ranging from 0. 5A to 1A for compact units. Output waveform: Pure sine wave for AC UPS, ensuring compatibility with sensitive electronics.

Battery and Backup: Integrated battery management system for external lead-acid or lithium $LiFePO_4$ batteries. Automatic charging and temperature-compensated voltage adjustment to extend battery life. Backup runtime: Small rack-mounted units (1–3 kVA) provide 11–46 minutes depending on load and battery capacity.

Deep discharge protection and fast recharge capability (full recharge in ~2 hours for lithium batteries),. Efficiency and Performance: High efficiency up to 96% with IGBT-based three-level conversion technology. Unitary output power factor for optimal load handling.

Continuous monitoring of mains and battery status with LED indicators and alarm outputs. Environmental and Operational Conditions: Operating temperature range: –25°C to +85°C for DC UPS modules. Relative humidity tolerance up to 95% without condensation.

Compact form factors: 2U rack-mount for small AC UPS, modular designs for industrial applications. Additional Features: External On/Off input for battery control. Maintenance-free buffer modules for short-term AC interruptions (up to 30 seconds) in industrial systems.

Modular and scalable design options to accommodate higher power requirements or redundancy. These AC/DC integrated UPS systems are suitable for industrial, telecommunications, and critical infrastructure applications in East Africa, providing reliable power continuity, protection against voltage fluctuations, and efficient energy management. They combine compact design, high efficiency, and advanced battery management to ensure maximum uptime and system availability.

Catalog UPS

For over 50 years, AEC has specialized in the manufacturing of uninterruptible power supply (UPS) systems designed to safeguard the power supply of industrial facilities. Technology and design come

UPS Uninterruptable AC/DC Power Supply

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated. This power supply is supplied by mains voltage and contains an integrated DC uninterruptible

Uninterruptible power supply (UPS) | Phoenix Contact

Find out about power supplies, DC/DC converters, redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix

Uninterruptible Power Supply, UPS Devices| Power Supplies | RS

An uninterruptible power supply, commonly known as "UPS Power Supply" is a device that is designed to supply power to your computers, servers and data centres in case of main power failure, electrical

UPS Systems

ABB has the UPS technology for every need. Protection against all power failures, voltage regulation, power factor correction and harmonics is guaranteed.

iPower DC UPS

The iPower-LP is an AC input, multiple DC output UPS System. Available in either 36W or 60W maximum outputs (12V), the iPower-LP provides USB A & C, PoE 24V or 48V (selectable) and 5V,

UPS Technical Specifications Document | PDF | Power Inverter

The document provides a technical specification for an uninterruptible power supply (UPS) system. It describes the key components of the UPS including the rectifier, battery charger, inverter, battery,

Uninterrupted Power Supply (Ups)

Apc Back-UPS 1000VA, 600W, Automatic Voltage Regulation (AVR), 4 Outlets with Battery Backup & Surge Protection, LCD Display/LED Indicators, Audible

IDC | Trusted Tech Intelligence

Navigate the changing tech landscape with IDC''s trusted intelligence and insights from 11 billion data points.

Battery Storage Cabinet Market Research Report 2034

Expanding Data Center and Telecom Infrastructure Driving UPS and Backup Power Cabinet Demand The explosive growth of hyperscale data centers, 5G telecommunications infrastructure, and cloud

East African Cables Product Catalogue

East African Cables is a leading manufacturer of cables in East and Central Africa with operations since 1966. Their vision is to be the preferred provider of cabling solutions and their mission is to exceed

Eaton UPS fundamentals handbook

Int roduct ion Welcome to the Eaton UPS and Power Management Fundamentals Handbook. From plug and receptacle charts and facts about power problems to an overview of various UPS topologies and

3 Phase UPS Power Supply | Schneider Electric South Africa

Explore a range of 3-phase UPS systems that deliver high availability and reliability with modular UPS and lithium-ion battery options. High-efficiency, fully integrated, and end-to-end uninterruptible power

SITOP | Siemens

The comprehensive SITOP power supply portfolio offers controlled 24 V DC power supplies for a wide range of industrial applications and requirements.

UPS5000-E

The overload capability and short-circuit capability are applicable to scenarios when the UPS works in ambient temperatures between 0°C and 40°C.

UPS Uninterruptable AC/DC Power Supply

This power supply provides an integrated professional battery management system to charge and monitor an external lead-acid battery. The result is a complete DC-UPS system in a compact housing

i4 UPS System single page.cdr

About i4 Series Single Phase Industrial UPS System Hitachi Hi-Rel Power Electronics Private Limited is a recognized name for high quality, proven technology and custom engineered Back-up and Power

UPS5000-E-180 kVA User Manual (Integrated UPS, 30 kVA Power

The overload capability and short-circuit capability are applicable to scenarios when the UPS works in ambient temperatures between 0°C and 40°C.
