Electrically cleaned fiber optic end face cooling channel intelligent manufacturer

Overview

An unclean connector end face will cause light scattering and permanent damage to the end face when the connector is mated.

Key Takeaways

Leading manufacturers like Offsoon and VIAVI provide automated, high-efficiency fiber optic end-face cleaning systems with intelligent controls and cooling channel integration.

Offsoon Series

Offsoon Pro and Offsoon Mark are advanced automated fiber end-face cleaning machines designed for single and multi-core fibers, MT ferrules, and optical modules. Key features include: Non-contact cleaning using a precise gas-liquid-gas sequence to remove contamination particles efficiently, achieving up to 98% cleaning efficiency. Intelligent control with visual display screens, settable buttons, and multiple cleaning programs for consistent operation and ease of use.

Cooling and filtration systems: High-precision air filters, oil mist separators, and micro-mist separators ensure contamination-free cleaning and maintain optimal operating temperatures. Automation-ready: Can be integrated with robotic arms and optical connector inspection systems to form fully automated cleaning and inspection lines. Cost-effective operation: Low running costs per cleaning cycle, making it suitable for high-volume manufacturing environments.

VIAV

I CleanBlastPROVIAVI CleanBlastPRO is another intelligent automated fiber end-face cleaning system suitable for production facilities. Its features include: Non-contact air-solvent-air cleaning sequence for precise removal of contamination. Comprehensive precision cleaning tips compatible with most fiber connector types.

High-performance air filtration and solvent management for safe, efficient operation. Integration capabilities: Supports foot pedal activation and backplane handset extensions for flexible deployment in manufacturing lines.

Manufacturer Capabilities

Both Offsoon and VIAVI provide scalable, intelligent solutions for fiber optic end-face cleaning, suitable for: Single and multi-fiber connectors (SC, LC, MT, MPO)Optical modules (TOSA, ROSA, SFP)Automated production and inspection lines These systems are designed to maintain high cleaning efficiency, reduce operator dependency, and ensure consistent quality in fiber optic manufacturing and assembly processes. For sourcing, companies like Dimension (Offsoon) and VIAVI Solutions are recognized leaders in intelligent fiber optic cleaning equipment, offering both standalone and fully integrated automated solutions.

Connector Cleaning FAQs | Corning

An unclean connector end face will cause light scattering and permanent damage to the end face when the connector is mated. From the four pictures below, you can

CleanBlastPRO

CleanBlastPRO™ is VIAVI''s newest automated fiber end-face cleaning system, designed for seamless deployment by component and connectivity manufacturers and integrators.

High-Precision Cleaning Head Enhanced User Interface for Superior ...

By configuring a variety of precision cleaning interfaces, It can efficiently clean the endfaces of fiber connectors, optical components, optical modules, and MT ferrules etc. It can also be applied to a fully

Fiber End-face Cleaning Machine,CLM-8001SMA

CLM-8001SMA is a cost-effective fiber end-face cleaning machine can quickly and efficiently clean the end-faces of optical modules, optical components, and fibre optic connectors, solving the cleaning

QbE® Cleaning Platform, Precision Wipe System

QbE Cleaning Platforms offer a more complete removal of microscopic contaminants, without the chance of damage to the optical fiber end face. Self

Qbe Cleaning Platform Products | Chemtronics

QbE® Cleaning Platforms offer a more complete removal of microscopic contaminants, without the chance of damage to the optical fiber end face. Self-contained cleaning tools that can be used dry or

On-Site Fiber Optic End Face Inspection and Cleaning

Find the On-Site Fiber Optic End Face Inspection and Cleaning That''s Right For You AutoGet MT Fiber Endface Inspector Its large-field-of-view (FOV)design ensures full-core coverage in a single scan,

Offsoon Mark II Plus Fiber Endface Cleaning Machine-DIMENSION

Off Mark   II   The Plus fiber end face cleaning machine attachments the cleaning principle of liquid+gas The cleaning solution can quickly dissolve the stakes on the end face of the

Fiber Laser Maintenance Checklist: Cleaning Connectors and Cooling ...

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Conclusion Regular maintenance of fiber lasers is essential to ensure their optimal performance and longevity. By focusing on crucial aspects such as cleaning connectors and

Heterogeneous Integration Technology Drives the Evolution of Co

Alignment deviation loss, on the other hand, is caused by the misalignment of the end faces of the waveguide and the optical fiber. The relative position of the optical fiber and the

Fiber optic end face cleaning machine

Fiber optic end face cleaning machine is used for optical communication devices, optical communication modules, optical communication equipment, and optical

Ten Practical Tips for Cleaning Fiber Optic Connector Ends

Learn fiber optic connector cleaning techniques, products, and tips to prevent contamination, ensure inspection, and avoid costly network failures.

Automated Touchless Cleaning for Fiber Optic End Faces

Discover how automated, touchless fiber optic cleaning technology ensures consistent, damage-free connector maintenance. Eliminate contamination, reduce downtime, and improve reliability for data

Cleaning of Fiber Ends

Fiber endfaces must be very clean. There are various dry and wet cleaning tools and methods for reliable cleaning. Thorough inspection after cleaning remains vital.
