Fiber Optic Cable Investment Project

Overview

TechCrunch has confirmed with sources close to the company that Meta plans to build a new, major, fiber-optic subsea cable extending around the world — a 40,000+ kilometer project that could total more than $10 billion of investment. Fiber-optic networks are the lifelines of the digital economy, providing the speed, reliability, and scalability required to support modern digital infrastructure. fiber Investments in Digital focus on expanding and improving fiber-optic networks that connect data centers, digital hubs. Our authors Evgeny Shibanov, Sergio Torres und Massimiliano Meneguz show how fiber optic investments nevertheless can provide resilient shareholder returns by focusing on securing demand, rethinking deployment strategies that streamline costs, and searching for alternative low-interest financing. Yet as fiber technology has proved its worth over the past decade, so these assets have grown to become some of the most popular among private equity and institutional investors seeking the stable, long-term cash flows that infrastructure can offer. Here's what you need to know: Costs: Fiber. CNBC's Katie Tarasov tours Corning's largest fiber facility in the world with fiber optics business head Mike O'Day in Concord, North Carolina, on January 8, 2026.
