Fiji Integrated Container Rack Type

Overview

Explore our wide range of high-quality containers designed to suit your specific needs, including dry units, refrigerated containers Fiji, open top, flat rack, and ISO tanks.

Key Takeaways

Fiji offers a range of integrated container rack solutions, including shipping container flat racks for cargo and modular IT/data center racks for servers and networking equipment.

Shipping Container Rack Types

In Fiji, companies like Tradecorp and United Containers Fiji Limited (UCFL) provide various container rack solutions for logistics and storage: Flat Rack Containers: Designed for oversized or heavy cargo such as machinery, pipes, or construction materials. Available in 20' and 40' sizes, these racks have foldable sides and high payload capacities, typically around 68,890 lbs. Open Top Containers: Ideal for cargo that cannot fit through standard doors, allowing loading from the top.

Refrigerated Containers (Reefers): Equipped for cold storage of perishable goods, including seafood and pharmaceuticals. Modular and Custom Containers: Tradecorp offers modifications for offices, housing, storage, and other functional spaces, integrating shelving or internal racks for organized storage. These container racks are suitable for both short-term projects and long-term storage, with options for purchase or rental.

UCF

L handles storage, repair, and movement of thousands of containers weekly, ensuring availability for large-scale operations.

IT and Data Center Rack Types

For I

T infrastructure, Datec Fiji provides integrated rack and enclosure systems: P Series Enclosures: Compatible with major servers, switches, and networking equipment, offering high levels of storage, cooling, and cable management. E Series Racks: Vendor-neutral racks that accommodate TIA/EIA 310-D standard equipment, ideal for small to medium data centers. Aisle Containment Solutions: Include overhead ceilings, vertical walls, and ducts to optimize airflow and cooling efficiency.

Heat Containment Systems (HCS): Direct heat extraction from racks to improve CRAC efficiency and maintain rack hygiene. These integrated racks are designed for efficient space utilization, thermal management, and scalable IT deployments, making them suitable for businesses and e-business solutions across Fiji and the South Pacific. SummaryFiji's integrated container rack solutions cover both logistics and IT applications: Logistics/Shipping: Flat racks, open tops, reefers, and modular containers for cargo handling and storage.

IT/Data Centers: P Series and E Series racks with advanced cooling, cable management, and airflow containment. Businesses can choose from new or used units, with customization options to meet specific project requirements, whether for industrial storage, shipping, or IT infrastructure.
