Function of Mobile Spectrometer

Overview

Mining and construction companies utilize portable spectrometers to identify mineral compositions directly in the field. This accelerates exploration and reduces reliance on lab analysis.

Article Content

Smartphone-based multispectral imaging for portable spectral analysis

A dedicated mobile application was independently developed for this system, incorporating functionalities such as Bluetooth control, spectral image acquisition, image processing,

Mobile And Portable Spectrometers in the Real World: 5 Uses

Mining and construction companies utilize portable spectrometers to identify mineral compositions directly in the field. This accelerates exploration and reduces reliance on lab analysis.

Understanding the Working Principle of Mobile Spectrometers: A ...

Mobile spectrometers are compact instruments designed to analyze the composition of various materials. They measure light spectra to determine the properties of substances, making

Smartphone Spectrometers

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

In this review, we detail the exciting recent development of smartphone spectrometer hardware, in addition to covering applications to which these units have been deployed, hitherto.

Mobile Spectrometer

The merging of spectroscopy with wireless technology offers opprotunities to improve personal health care and has several other applications in chemical sensing and color analysis.

SPECTROTEST

This mobile metal analyzer flaunts its superior performance especially when exact metal analysis is required, when materials are difficult to identify or when there is

A mobile device-based imaging spectrometer for environmental

In this study, we demonstrate a mobile-device based imaging spectrometer that is standalone and supported on a commercial digital camera.

A Portable Fiber Optic Real-time Smartphone-based Visible

The method employs point-of-use approaches both for sample preparation and sample measurement, demonstrating the capability for mobile quality control of pharmaceutical and food

This Tiny Device Could Turn Your Phone Into a Lab-Grade Spectrometer

This game-changing device replaces bulky traditional spectrometers and could soon be embedded in smartphones, unlocking powerful tools for material analysis, biomedical diagnostics,

Portable & Handheld Spectrophotometers | Learn More | X-Rite

A portable spectrophotometer is a compact instrument ideal for measuring color, verifying tolerances, identifying metamerism, and taking pass/fail measurement for quality control.

Mobile optical emission spectrometer ferro.lyte®

The mobile spectrometer ferro.lyte with its innovative all-in-one concept is optimized for the precise metal analysis wherever needed.

Bruker Launches the Portable MOBILE-IR II Spectrometer

This powerful mobile spectrometer will enable users worldwide to bring routine and advanced FT-IR applications to the field. The MOBILE-IR II is intended to

Ultra-simplified diffraction-based computational spectrometer

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Miniaturizing spectrometers for compact and cost-effective mobile platforms is a major challenge in current spectroscopy research, where conventional spectrometers are impractical due to

Mobile Metal Analyzer

For onsite metal analysis, SPECTRO offers a complete range of mobile metal analyzer products, from handheld XRF to portable Arc Spark OES spectrometers.

Mobile Spectrometer

About We have developed a new ultra-low cost, ultra-compact, high-performance spectrometer technology that can potentially lead to a device of centimeter size dimension with high spectral

SPECTROTEST

The SPECTROTEST mobile arc spark spectrometer is ideal for many applications in the metal producing, processing, and recycling industries. Find out more.

Portable and Handheld Spectroscopy

Portable and Handheld Spectroscopy | Topic | Spectroscopy connects analytical chemists with insights in molecular and atomic spectroscopy techniques, such as Raman, infrared

Development of a smartphone based spectrometer for high ...

Here we present SpectraPhone, a smartphone-integrated, portable spectrometer designed for quantitative, point-of-care urinalysis.
