Glowing Tail Fiber

Overview

Fiber Optic Tails are soft plastic strands that glow with gentle light from end to end. Their slow color changes and sparkle effect invite calm attention and quiet play. You can drape them over your shoulders, across your lap, or run them through your hands. Fibre optics are a sensory room. A beautiful spray of acrylic fibre optic side tails that glow, sparkle and change colours creating a calming sensory experience. The optical fibers “Side-Glow” are used to create curtains, chandeliers, leaving plenty of space for imagination and creativity in many. These stunning Sensory Fibre Optic Tails are perfect for aiding children and adults with special needs, including intellectual disabilities and autism. A perfect addition to any sensory room! These.
