High-precision fiber optic end-face inspection instrument with remote monitoring type maintenance

Overview

Th is full function fiber inspection scope is a fully automated tool to check and analyze fiber optic connector end faces for dirt, condition, and quality as per IEC61300-3-35 requirements. Images are auto centered/focused and can be viewed directly on an integrated LCD display. With support for a broad range of ferrule types—including single-core, multi-core, MPO/MTP, SMA-905, and even plastic optical. Facing the fast-growing 800G, 1. 6T optical module, MPO connector and high-density connector markets, the efficiency and accuracy of end face inspection have become a key bottleneck in increasing production capacity. A non-contact technique called scanning white-light interferometry (SWLI) provides high accuracy, repeatability, and reliability for fiber connector testing, particularly for. Microscopes for network maintenance, lab and manufacturing to inspect the end face of single and multi-fiber connectors for scratches, defects and contamination. Compact microscopes for endface inspection of all types of single and multi-fiber optical connectors, patch cords and bulkhead, including. Thorlabs' Fiber End Face Inspection Systems include a Fiber Cleave Analyzer that performs interferometric measurements on bare fiber and a Visual Scratch & Defect Inspection System to examine the end face of fiber connectors. We also offer two scanning white-light interferometers (SWLI) that enable.

Article Content

HTO-7000B Fiber End Face Detector – 200X/400X Microscope

It is used for high-precision inspection of fiber connector end faces in labs, production lines, and field maintenance, ensuring polishing quality and cleanliness.

Fast Check MT Fully Fiber Endface Inspector

It adopts a large-field camera and high-precision optical system to realize one-time full-end face imaging and detection of multi-core connector end faces, and integrates fully automatic intelligent detection

Fiber End Face Interferometer

The GL16 Interferometer provides all the necessary components for fiber end face geometry measurement integrated into a compact housing with a 7" capacitive

Sumix | Fiber inspection microscopes overview

All-in-one probe for checking the end face clarity of single and multi-fiber optic connectors. Designed to offer exceptional detail of the image as well as convenience for on-site inspections in data centers,

Fiber End Face Inspection

Thorlabs'' Fiber End Face Inspection Systems include a Fiber Cleave Analyzer that performs interferometric measurements on bare fiber and a Visual Scratch & Defect Inspection System to

All-in-one Fiber Optic End-face Inspection Scope,IV200M

It automatically detects surface files and automatically analyzes spectral ends to generate reports. The use of coaxial optical amplification system and high

Fiber End-face Visual Inspector

AUTOCHECK Intelligent Integrated Fiber End-face Visual Inspector AutoCheck is the first intelligent integrated fiber end-face inspector developed by Dimension Technology. With the advantages of

Fiber Inspection Scope Products

Shop fiber optic inspection scopes, including single- and multi-fiber inspection products from trusted brands like Dimension, Domaille, Viavi, and Jonard.

Interferometric End Face Inspection

Interferometric end face inspection is a non-destructive and non-contact technique to inspect the optical fiber''s end face, ensuring the quality and reliability of optical fibers in high-speed data transmission

Endface Inspection-DIMENSION

Endface Inspection- Dimension is committed to creating a series of optical fiber end-face defect inspection products. For the fiber optic manufacturing and

Fiber End-Face Inspection and Interferometry

Overview Fiber End-Face Inspection and Interferometry are essential practices in maintaining high-performance fiber optic networks. Contamination and poor geometry on fiber connectors are leading

FiberSafe Fiber Scope | Kingfisher International

FiberSafe Fiber Scope handheld fiber optic connector end-face inspection microscope with superior image quality, improved eye laser safety.

EasyCheck Integrated Fiber End-face Visual Inspector

Easycheck is an integrated fiber endface inspector developed by dimension technology; it combines optical microscope and monitor in a body other than

AUTOCHECK Intelligent Integrated Fiber End-face Visual Inspector

AutoCheck is the first intelligent integrated fiber end-face inspector developed by Dimension Technology. With the advantages of Dimension image analysis software and high performance

Purchase Fiber Optic Inspection Tools Online

Buy fiber optic inspection equipment and tools from Cables Plus USA. Our fiber optic inspector tools offer networking installers many choices of endface inspectors and probes including single/multi-fiber

SUN-EC-A Fiber End face Inspector

SUN-EC-A series of fiber end-face inspector has clear images and a long lifetime. It has different kinds of adaptors for a wide variety of connectors. It is easy to operate and widely used in fiber optic patch

On-Site Fiber Optic End Face Inspection and Cleaning

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Find the On-Site Fiber Optic End Face Inspection and Cleaning That''s Right For You AutoGet MT Fiber Endface Inspector Its large-field-of-view (FOV)design ensures full-core coverage in a single scan,
