How much does 24-core fiber optic cable cost for smart buildings

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

The price of a 24-core fiber optic cable for smart buildings typically ranges from $0. 80 to $1. 50 per meter, with final costs influenced by fiber type, jacket rating, connectors, and custom configurations.

Pricing Overview

The cost of a 24-core fiber optic cable depends on several factors including fiber type (singlemode OS2 or multimode OM3/OM4), cable construction, jacket material, plenum rating, and pre-termination options. For example, bulk 24-core singlemode cables can range from $0. 80 to $1.

50 per meter, while pre-terminated or custom assemblies may increase the price due to labor and connector costs. Multimode cables, such as OM3 or OM4, may have slightly different pricing depending on performance specifications.

Customization Options

Smart building installations often require custom lengths, connector types, and jacket ratings: Connectors: LC, SC, ST, FC, MTRJ, MTP, APC, UPC. Jacket Types: Indoor, outdoor, plenum (OFNP), riser (OFNR), armored, aerial, tactical. Fiber Count & Modality: 24-core is common, but custom counts from 1 to 48 fibers are available.

Breakout Lengths: Pre-terminated assemblies often allow breakout lengths from 0. 5m or as specified by the customer.

Factors Affecting Price

Material Quality: High-density polyethylene (HDPE) jackets, flame-retardant compounds, and anti-tracking additives increase durability and cost. Mechanical Design: Armored or aerial designs for added protection or installation flexibility can raise prices. Installation Type: Pre-terminated cables save labor costs but have higher upfront pricing compared to bulk spools.

Compliance & Safety: Plenum-rated cables for air-handling spaces are more expensive due to fire-retardant and low-smoke materials.

Typical Use Cases in Smart Buildings

Indoor backbone cabling for high-speed data and IoT devices. Plenum-rated installations in ceilings and risers to meet fire safety codes. Pre-terminated assemblies for rapid deployment and reduced splicing time.

Summary

For a 24-core fiber optic cable in smart buildings, expect a base price of $0. 80–$1. 50 per meter for bulk singlemode cables, with additional costs for custom lengths, pre-terminated connectors, plenum-rated jackets, or armored designs.

Engaging a supplier with a custom cable configurator can help optimize specifications and pricing for your building's requirements.
