# How much does PVC optical cable cost

## Overview

On average, Single-mode (OS2) ranges from $0. Factors like armor, jacket rating (LSZH), and raw material indices influence the final ex-factory price. Commercial building installations with 100-200 network drops generally range from $15,000 to $30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from $1 to over $ 50 per linear foot, depending on the installation method. We carry bulk network cable in 1000-ft rolls for installation professionals who go through a lot of cable in the installation and/or maintenance of their applications and projects. These cables include gel-filled cores and water-blocking protection.
