How to adjust the brightness of a spot amplifier

Overview

Intensity control is provided for adjustment of brightness of the spot on the screen. My darkest sounding cabinets are the best balances, such as my 4x12 full of EVM-12Ls, and yes, those ARE relatively dark speakers compared to some. by Roe » Tue Jul 01, 2025 1:24 am try a high-capacitance cable from the guitar, turn up the volume a bit and consider a warmer bias on the el34s. That is true! You can set and play high-quality music with your sound system by measuring the resistance, voltage, and watts and calculating the amplifier's gain. You will find more controls out there, things like 'presence' or 'contour' and we will look at those. When an amplifier processes the signal that comes from your guitar's pickups, it goes through two stages. The first stage is called the “preamp”.
