

How to connect the cable tray to the bend in the power supply

Overview

Simply make the appropriate cuts in the side wall of the tray you are joining a length to, bend down the side wall, and attach a TX bracket either side. Riser links must always be installed in pairs, one on each side of the tray. Connecting cable trays correctly is essential for system safety, load stability, and long-term performance. Choosing the right one depends on project conditions, load. Unlike the CT range of tray, the ET range does not come with pre-made fittings, rather, it uses accessories that allow you to bend, rise, or join straight lengths together either in series or to fabricate a tee or cross shaped connection. In order to begin the job, trace a straight line where the trays. To properly bond Hubbell ® painted cable tray, remove the plastic masking device from the trays on each end (exposing the pre-galvanized wire), and splice sections together using Hubbell ® splice kits. Eaton's B-Line series Flextray wire basket tray and splices out performs many other mesh trays, helping ensure the integrity and quality of cable pathways. You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make on Students trading aid on how best to put an internal 90 degrees bend in steel cable tray.
