How to display network rack pricing

Overview

Amazon.com: Network RackStreamline your network setup with versatile wall-mounted racks. Explore lockable, well-ventilated designs that support standard 19.

Key Takeaways

Network rack pricing can be displayed clearly by itemizing costs for rack space, equipment, power, cooling, and connectivity, using tables, calculators, or interactive tools. Itemize Costs by ComponentTo present pricing effectively, break down the total cost into key components: Rack Space: Standard racks typically cost $500–$2,000 per month, while high-density or custom racks can range from $2,500–$6,000 depending on specifications and location. Equipment: Servers ($1,000–$10,000 each), networking devices like switches and firewalls ($500–$5,000 each), and storage devices ($100–$3,000 each) should be listed separately.

Power and Cooling: Include PDUs ($200–$1,500), UPS systems ($1,000–$10,000), and cooling solutions ($500–$5,000) to reflect operational costs. Labor and Installation: Rack and stack labor can range from $50–$200 per hour, with total installation costs for medium setups between $5,000–$20,000. Connectivity: Account for bandwidth, cross-connects, and optional services like VPN/MPLS or dark fiber.

Use Tables or Spreadsheets

A clear table or spreadsheet allows clients or internal teams to see each cost component and the total monthly or one-time charges. Example: ComponentQuantityUnit CostTotal CostStandard Rack1$1,200/mo$1,200Server5$3,000$15,000Switch2$1,000$2,000PDU1$500$500Labor10 hrs$100/hr$1,000Total$19,700Online Calculators and ToolsSeveral platforms provide instant pricing estimates based on your exact requirements: ColocationPLUS: Allows you to add each server, switch, firewall, or storage device and generates a PDF or CSV with preliminary pricing. Netwise Colocation Calculator: Provides instant quotations based on your rack and equipment specifications.

Rack

Colo: Lets you filter by rack size, location, power, and bandwidth to compare pricing across providers.

Best Practices

Include all hidden costs: Cross-connects, metered ports, and remote hands services can significantly increase the final invoice. Specify contract terms: Monthly recurring charges (MRC) and term length affect pricing. Visualize for clarity: Use charts or color-coded tables to highlight high-cost items or optional services.

Update regularly: Rack pricing can vary by market, power density, and provider, so ensure your display reflects current rates. By combining itemized tables, online calculators, and clear visualizations, you can display network rack pricing in a way that is transparent, accurate, and easy to understand for stakeholders.
