How to install a wall-mounted cable management bracket

Overview

Our in wall cable management kits come with templates and hole saws, so all you've gotta do is line up the wall plates, drill in, and go. Cut one hole behind the TV and another near your outlet or media console. Install the grommets and wall plates. These systems route cables discretely through the wall cavity, offering a professional, organized look, particularly when televisions are mounted flat against the. The practice of in-wall cable management involves concealing television and media wires behind drywall to create a clean, minimalist aesthetic. This process replaces visible cord bundles with discreet entry and exit points, greatly enhancing the look of a wall-mounted display. Successfully. In this case, hiding your cables by installing the cables inside the walls is the better option as this will completely hide them from view and unintentional tampering.
