How to seal trapezoidal cable trays and their pricing

Overview

Cable trays Need help selecting the right cable ladder or -tray for your project?

We offer a wide range of cable tray systems to support tubing, electrical.

Key Takeaways

Trapezoidal cable trays can be sealed using specialized weatherstop or penetration seal systems, with prices ranging from $10 to $100 per meter depending on material and specifications. Sealing Methods1. Weatherstop Systems: Products like WSP weatherstops use a powder-coated or galvanized steel frame that surrounds the cable tray at the penetration point.

Water-resistant pads coated with silicone-based sealant provide a weathertight barrier. These systems are suitable for outdoor, wet, or corrosive environments and can accommodate any cable size or quantity. Installation can occur before or after tray and cable placement, and maintenance is straightforward without additional parts.

2. Penetration Seals: Manufacturers such as CSD Sealing Systems, Roxtec, and Metraflex offer industrial-grade seals for cable trays. These include multi-cable penetrators, fire-resistant seals, and high-pressure or corrosion-resistant frames.

Materials like EPDM rubber or Roxylon provide resistance to water, ozone, sunlight, and temperature extremes (-40°F to +400°F). These seals are designed for wall, floor, or bulkhead penetrations and can handle trapezoidal tray shapes. 3.

Installation Considerations: Ensure the seal frame matches the tray dimensions. Use chemical- and corrosion-resistant materials for outdoor or industrial environments. Verify compatibility with cable maintenance and future additions.

Follow NEM

A or local standards for environmental and safety compliance.

Price Estimates

The cost of sealing a cable tray depends on the type of seal, material, and environmental requirements: Basic weatherstop or standard penetration seals: $10–$30 per meter. Heavy-duty, fire-resistant, or high-pressure seals: $50–$100 per meter. Custom or large multi-cable penetrators: Prices may exceed $100 per meter depending on specifications and supplier.

Additional Costs: Labor for installation, especially in tight or elevated spaces. Accessories such as mounting brackets or additional sealant. Shipping and handling for specialized materials.

Summary

To seal a trapezoidal cable tray effectively, choose a weatherstop or penetration seal system that matches the tray dimensions and environmental conditions. Prices vary widely based on material and performance requirements, typically ranging from $10 to $100 per meter. For precise budgeting, provide suppliers with tray dimensions, cable quantity, and environmental conditions to obtain accurate quotes.
