How to secure cable trays to a support frame

Overview

Horizontal hoisting is a common method for installing cable trays, especially when overhead support is available. This method primarily relies on two key accessories: hoisting frames and cross arms, each suited for different specifications of cable trays. This article gives a brief idea of cable tray supports, methods of fixing the supports, and their role in cable management systems. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment.
