Installation of High and Low Voltage Complete Sets of Equipment in Albania

Overview

EnBi Power L.t.dOur expertise lies in design services, starting from feasibility studies until the completed detailed design for execution. We keep in-hous.

Key Takeaways

Albania has several experienced companies capable of providing complete high, medium, and low voltage electrical equipment installation, including design, supply, testing, and commissioning. Key Companies and CapabilitiesEnBi Power L.t.d specializes in the full lifecycle of electrical projects, including substations, overhead lines (high, medium, and low voltage), cable lines, SCADA systems, and electro-mechanical works in hydropower and photovoltaic plants. They provide in-house civil and electrical work, testing, commissioning, and ongoing operation and maintenance services, with over 20 years of experience and ISO certification.

ET

S shpk focuses on high, medium, and low voltage systems, offering installation and maintenance of generating equipment, electricity supply, and distribution systems for industrial and telecommunications applications. They have a qualified technical engineering staff capable of delivering complete solutions efficiently and reliably. Albesol provides comprehensive services in Albania and Kosovo, including manufacturing medium voltage SM6 switchgears up to 20 kV, authorized sales and service of European electrical brands, and installation of LV, MV, and HV systems.

They are licensed partners of Schneider Electric and Kohler SDMO, ensuring high-quality equipment and after-sales support.

ENP

I offers design, assembly, and supply of electrical equipment for power distribution and transmission lines. Their product range includes LV accessories, MV modular or RMU panels, metal and concrete kiosks, and complete substation solutions. With over 30 years of experience, ENPI emphasizes quality, innovation, and adherence to international standards.

Services Offered

Design and Feasibility Studies: Detailed planning for substations, transmission lines, and distribution networks. Supply of Equipment: High-quality HV, MV, and LV switchgears, panels, transformers, insulators, and cable accessories. Installation and Commissioning: Civil works, erection, electrical installation, testing, and SCADA integration.

Operation and Maintenance: Ongoing support for substations, distribution networks, and renewable energy projects. Specialized Projects: Hydropower plants, solar parks, industrial and commercial electrical systems, and telecommunication infrastructure.

Conclusion

For projects requiring complete high and low voltage electrical installations in Albania, companies like EnBi Power, ETS, Albesol, and ENPI provide end-to-end solutions, combining local expertise, certified equipment, and extensive project experience. These companies can handle everything from design and supply to installation, testing, and maintenance, ensuring compliance with international standards and reliable operation of electrical systems.
