

Italian cable tray bending equipment

Overview

Schiavetti Tekno is the production unit dedicated to standard and tailor-made cable trays and accessories.

Key Takeaways

Italy offers high-precision, customizable cable tray and tube bending machines from manufacturers like Macri Italia, Comac, and Spina Group, designed for industrial efficiency and durability.

Key Italian Manufacturers

Macri Italia specializes in electric tube bending machines made entirely of steel, offering 1 to 12 axes machines with clockwise and anticlockwise bending. Their CNC-controlled machines are highly versatile, suitable for hydraulic connections, petrol pipes, and other industrial applications, and can be tailored to specific customer requirements. Comac produces profile and section bending machines with over 35 years of experience.

Their machines are designed for high accuracy, repeatability, and minimal maintenance, making them suitable for long-term industrial use. Spina Group focuses on integrated production solutions, including cable trays and accessories. Their Schiavetti Tekno line offers standard and tailor-made cable trays with UL certification and compliance with NEMA standards, ensuring high-quality Italian manufacturing.

Features of Italian Cable Tray Bending Machines
CNC Precision: Machines often include CNC systems for accurate mold positioning and consistent bending results.
Automation: Many machines support automatic cutting, stacking, and batch production, improving efficiency and reducing labor costs.
Versatility: Capable of bending various types of cable trays, including ladder and perforated trays, as well as tubes and profiles for industrial applications.

Durability: Built with high-quality steel and engineered for long-term use with minimal maintenance.
Customization: Machines can be configured with multiple axes, software options, and tooling to meet specific production needs.

Applications

Italian cable tray bending equipment is widely used in electrical, construction, and industrial sectors, supporting the production of cable trays, piping systems, and structural profiles. These machines are ideal for manufacturers seeking precision, efficiency, and compliance with international standards. For sourcing, companies like Macri Italia, Comac, and Spina Group provide direct sales and custom solutions, ensuring that equipment meets both production and regulatory requirements.

9m/min Full Automatic Cable Tray Forming Machine 380V 440V 220V Customizable Options Product Overview The cable tray rolling and forming machine is an essential piece of equipment for modern

Macri Italia

Macri Italia designs and produces electric tube bending machines made entirely of steel. A small industry gem, the company works almost exclusively to order,

We Produce

Schiavetti Tekno is the production unit dedicated to standard and tailor-made cable trays and accessories. Schiavetti Tekno products are available with UL certification and built according to

Machine for making various bends in cable trays

This advanced Cable Tray Bending Machine offers unparalleled precision and efficiency in producing high-quality cable trays for various industrial applications.

Roll forming systems for Systems for cable trays struts

Gasparini's machines can manufacture supports for power cable troughs at an exceptional standard. The plants are innovative and high-performing, and can be tailored to the most specific of requirements.

HOPEX CNC Cable Tray Bending Machine

HOPEX CNC Cable Tray Bending Machine delivers high precision and intelligent linkage, equipped with IoT-enabled monitoring and adaptive control. It

Cable Tray Bending Machine | Hopex Production Line

It is suitable for producing straight and short-length trays with consistent angles and smooth edges. Equipped with a stable hydraulic or servo bending system and intelligent control, the machine

Cable Trays

Our profiles are compatible with all cable tray and cable ladder types, guaranteeing perfect alignment, stability, and load distribution. The system is suitable for both

Cable Trays

Cable Trays Schiavetti Tekno, part of Spina Group, is a leading Italian manufacturer of cable trays and accessories for electrical and instrumentation systems. Since

Cable Tray Bending Equipment for Efficient and

A cable tray bending machine is a specialized piece of equipment designed to shape metal trays used for electrical cable management. These machines can

Galvanized Cable Tray Bending Machine, Suitable for

First of all, in terms of quality, the bent cable tray is much stronger than the formed cable tray, including the shape. The second point: With the continuous increase

Automatic Cable Tray Bending Machine

As someone deeply involved in the manufacturing sector, I've witnessed firsthand the advantages of the automated cable tray bending machine. This innovative equipment streamlines the

Advanced Cable Tray Bending Equipment for Enhanced Performance

First of all, in terms of quality, the bent cable tray is much stronger than the formed cable tray, including the shape. The second point: With the continuous increase of labor costs, our automatic bending

Automatic Channel Cable Tray Bending Machine C

First of all, in terms of quality, the bent cable tray is much stronger than the formed cable tray, including the shape. The second point: With the continuous increase

Cable Tray Bending Equipment for Efficient Wire Management and ...

Conclusion Cable tray bending machines represent a vital aspect of modern electrical installations and infrastructure development. Their role in creating organized, safe, and efficient cable systems cannot
