Large Model of Ladder-Type Cable Tray

Overview

Cable trays: 3D models Discover all CAD files of the "Cable trays" category from Supplier-Certified Catalogs SOLIDWORKS, Inventor, Creo, CATIA, Solid Edge.

Key Takeaways

Ladder-type cable trays are robust, open-structured systems designed to support heavy cable loads while ensuring ventilation, durability, and ease of installation. OverviewLadder-type cable trays feature a rung-and-side-rail design resembling a ladder, providing strong support for large bundles of cables and promoting natural airflow to prevent heat buildup. They are widely used in industrial plants, commercial buildings, and data centers, where heavy-duty cable management is required.

The open design allows for easy installation, maintenance, and inspection, reducing downtime and enhancing operational efficiency.

Materials and Construction

These trays are typically fabricated from high-grade steel, aluminum, or fiberglass, offering corrosion resistance, mechanical strength, and long-term reliability. The choice of material depends on environmental conditions, load requirements, and budget considerations. Steel trays are ideal for heavy loads, aluminum provides lightweight durability, and fiberglass is suitable for corrosive environments.

Features and Benefits

Strong Support: Parallel rungs provide robust load-bearing capacity for large cable bundles. Ventilation: Open ladder design enhances airflow, reducing heat accumulation and maintaining cable integrity. Flexibility: Adjustable rung spacing and accessories like bends, tees, and intersections allow versatile routing.

Ease of Installation: Lightweight yet durable construction simplifies mounting and maintenance. Safety and Compliance: Designed to meet industry standards for cable management, ensuring safe and organized installations.

Cost-

Effectiveness: Lower installation and maintenance costs compared to traditional conduit systems.

CAD Models and Design Resources

For large-scale projects, 3D CAD models of ladder-type cable trays are available in formats compatible with SOLIDWORKS, Inventor, Creo, CATIA, AutoCAD, Revit, STEP, STL, IGES, and DXF. These models facilitate precise planning, integration with building designs, and simulation of cable routing. ApplicationsLadder-type cable trays are suitable for: Industrial environments: Heavy machinery and power distribution systems.

Commercial buildings: Structured cabling for offices and facilities. Data centers: High-density network cabling requiring ventilation and organized routing.

Conclusion

Large ladder-type cable trays provide a durable, flexible, and efficient solution for managing heavy cable loads in diverse environments. Their open design, strong support, and compatibility with CAD modeling make them essential for modern infrastructure projects, ensuring organized, safe, and cost-effective cable management.

Cable trays: 3D models

Discover all CAD files of the "Cable trays" category from Supplier-Certified Catalogs SOLIDWORKS, Inventor, Creo, CATIA, Solid Edge, autoCAD, Revit and many more CAD software but also as STEP,

STANDARD LADDER TYPE CABLE TRAY

It consists of two longitudinal side rails connected by perforated rungs at regular intervals, providing excellent cable support, ventilation, and ease of installation

Ladder Type Cable Trays

In this comprehensive guide, we''ll walk you through the precise steps and considerations required to install Pioneer''s ladder type cable trays with efficiency and precision, ensuring optimal cable

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Cable Ladder Trays (Welded and Swaged)

Cable Ladder Trays (Welded & Swaged) Cable Ladder Trays, are designed to meet most requirements of cable and electrical wire installations and comply to local and international standards of fabrication

Ladder Cable Trays | McMaster-Carr

Choose from our selection of ladder cable trays, including cable and hose trays, heavy duty open cable and hose carriers, and more. Same and Next Day Delivery.

CABLE TRAY, CABLE LADDER, CABLE TRUNKING CATALOGUE

Rung spacing: 300mm. Material: Mild steel sheet / PO steel sheet. Constructed Type: MIG welding. er coating / Ho Horizontal Tee.

CABLE TRAY SYSTEMS GUIDE

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable.

Ladder Type Cable Trays

Ladder Trays are essentially assembled trays using two “C” Channels and a central rung. The central rung is attached to the side channel using high quality polymer (PBT) mechanical pin and epoxy

Ladder Type Cable Trays

Robust ladder-type cable trays for heavy-duty cable support and easy installation. We are a trusted manufacturer of ladder-type cable trays, engineered to provide

CABLE LADDER SYSTEM

C. TRAY TYPES Ladder cable tray. Ladder shall consist of two side-rails with rungs riveted to the bottom flange of the side-rails. rungs shall be spaced 8” or 12” (200 or 300 mm) on center. rungs

Best Practice Guide to Cable Ladder and Cable Tray Systems

Introduction This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports.

B-Line series Cable Tray Design Considerations

Is your cable tray system optimized for safety, dependability, space and cost savings? Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an

Ladder Type Cable Trays

Ladder Type Cable Trays We are a trusted manufacturer of ladder-type cable trays, engineered to provide exceptional support and organization for heavy-duty cabling systems. Designed with parallel

Cable Ladder | EAE USA

Ladder-type cable trays are typically preferred for projects involving heavy, large-diameter cables or cables carrying sensitive signals. Their robust design ensures cables are securely and neatly

Types of Cable Trays – Advantages, Applications and Sizes

Explore the types of cable trays, their advantages, applications, and standard sizes. Learn how they improve cable management and support various industries.

Standard Steel Ladder Type Cable Trays

Product Name: Standard Steel Ladder Type Cable Trays Product Details Product Size: Please see attached file (This 3D set consists of models more than 5 for you to choose to use.)

Ladder Cable Tray, Ladder Cable Tray Manufacturer, Welded Type Cable Tray

Benefits of Ladder Cable tray are enormous in installation of power cables and ladder type cable tray can be customised as per project requirements, also available as welded ladder cable tray with width

Ladder Type Cable Trays for Industries | Ajay Industrial

Ladder type cable tray is a versatile cable management solution that provides high load capacity and allows for easy access to cables. It features rungs that are spaced at regular intervals and can be
