Libyan Well Logging Optical Cable System Manufacturer

Overview

Silphium The Silphium cable system is first wholly-owned submarine cable system of the Libyan International Telecom Company (LITC), with OTEGLOBE providing.

Key Takeaways

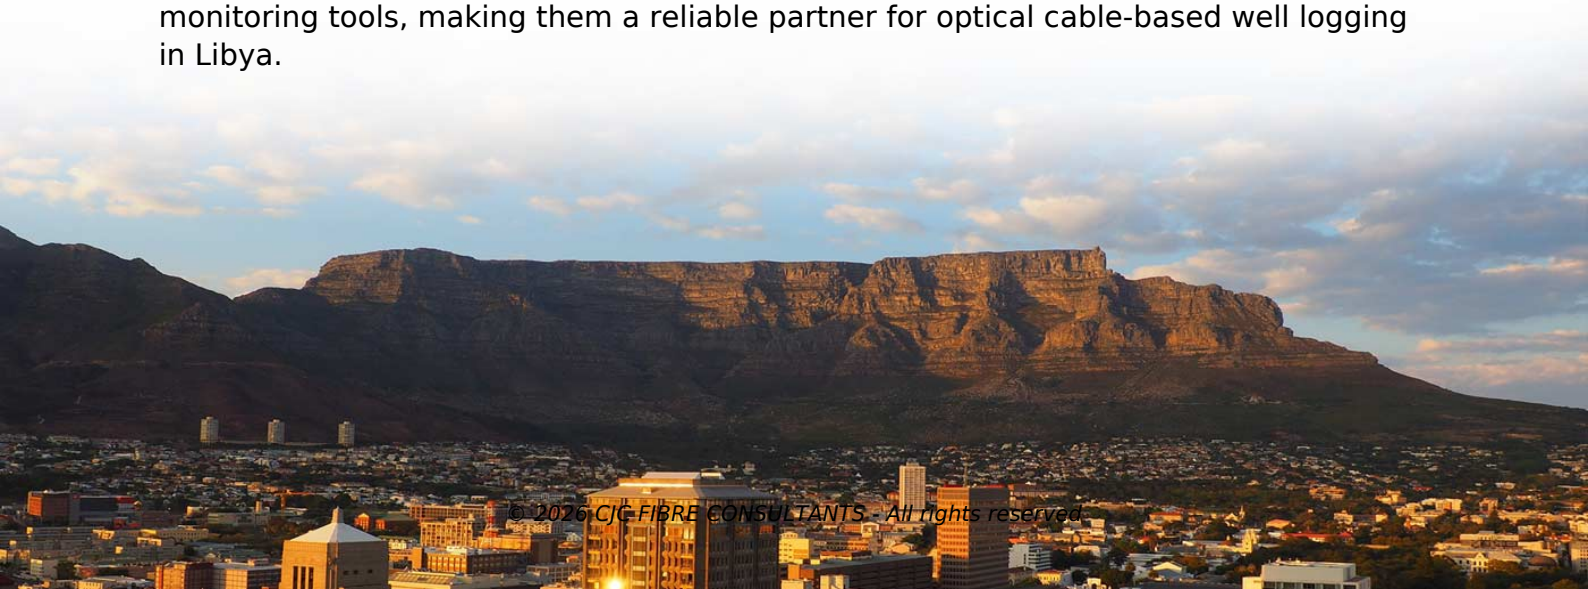

PETECS and Camco are key providers of well logging and optical cable systems in Libya, offering advanced wireline and fiber-optic solutions for oil and gas operations.

PETECSPETEC

S is an integrated oil and gas services company with registered offices in Libya, Algeria, UAE, and Romania. They provide well testing, wireline logging, production optimization, well completion, artificial lift, and well intervention services. Their teams deploy proven technology for reservoir characterization and hydrocarbon detection, ensuring safety and operational efficiency.

PETEC

S specializes in reservoir engineering, surface facility management, and advanced monitoring tools, making them a reliable partner for optical cable-based well logging in Libya.

Camco

Camco offers a comprehensive range of slickline and wireline services for both land and offshore operations. Their systems include pressure control equipment, logging trucks, and slim wireline tools capable of operating in extreme desert environments. Camco provides open hole and cased hole well-logging services, including gamma ray, density, porosity, permeability, and fluid typing measurements.

Their optical and telemetry systems allow accurate real-time and memory-mode data acquisition, even in complex well geometries, horizontal wells, or wells with poor integrity.

Services and Capabilities

Both PETEC

S and Camco provide: Fiber-optic and wireline logging systems for detailed reservoir evaluationReal-time and memory-mode data acquisition for formation analysisAdvanced telemetry and slimline tools for challenging well conditionsProduction optimization and perforation services to enhance hydrocarbon recoveryReservoir characterization including lithology, mineralogy, porosity, density, and fluid typing These companies are equipped to design, deploy, and operate optical cable systems for well logging in Libya, supporting oil and gas operators in maximizing production efficiency and reservoir understanding.

Conclusion

For well logging optical cable systems in Libya, PETECS and Camco are the primary manufacturers and service providers. They offer state-of-the-art wireline and fiber-optic technologies, capable of handling complex well environments and providing comprehensive reservoir data for oil and gas operations.

Petroleum Services

By combining advanced technologies with technical expertise, Camco supports operators in maintaining well integrity, optimizing production, and improving recovery across Libya''s oilfields.

Welcome to OAPEC

The Company owns fourteen drilling rigs operating in Libya, Syria and Jordan. It has also established workshops, storage facilities, and a division for the maintenance and testing of equipment, supply of

About Us

We have registered offices in Libya, Algeria, UAE and Romania. Our highly skilled engineers and technicians source and deploy proven technology to ensure the safety, integrity and optimum

Lorasco – We are taking oilfield services to next level in libiya

Lorasco has the ability to perform efficient and effective coiled tubing (CT) interventions, we offer practical applications for matrix stimulation, scale removal, well-bore clean-out, nitrogen kickoff, well

Camco Libya

Camco is a pioneer in the Libyan oil and gas industry. One of the first oilfield services providers in Libya, with over 30 years'' experience, Camco''s experienced teams have worked in most

Medusa Subsea Cable System Landed in Libya

The Libyan Post, Telecommunications and Information Technology Company (LPTIC) has announced the launch of the ''Medusa'' submarine cable project. LUIC joined the Medusa project in

Libyan undersea fiber-optic cable system Silphium launches

Silphium connects traffic from Libya to many European Internet hubs via the landing point in Chania, which OTEGLOBE will operate. It is the third undersea fiber-optic cable to serve the Libyan market.
