Mauritius Secondary Distribution Box Specifications and Models

Overview

Find durable distribution boxes and enclosures for circuit breakers at Electrical.mu. Ideal for safe and organized electrical setups in Mauritius.

Key Takeaways

Secondary Distribution Boxes (SDBs) in Mauritius are modular enclosures designed to distribute power from main distribution systems to branch circuits, available in various models with capacities up to 540 A.

Overview

A Secondary Distribution Box (SDB) receives power from the main distribution box and distributes it to branch circuits or floor modules via extender cables. These boxes are typically powder-coated black for durability and can be fitted with terminal blocks for custom wiring configurations, making them suitable for residential, commercial, and industrial applications.
