

Mining Industrial-Grade Gigabit Switch

Overview

Managed 8-port Layer 2 PoE+ switch with 4 SFP slots expands your Gigabit network in industrial environments, including mines, military bases and oil/gas sites. With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these modular switches are your foundation for industrial AI. Managed with Cisco Catalyst Center or Cisco. A leading large-scale coal mining group in Northern China, known for its extensive reserves and advanced extraction capabilities, initiated a digital transformation project to upgrade its underground infrastructure. With assets spanning hundreds of square kilometers and an annual production. Keep your industrial operations running smoothly with secure, compact, Power over Ethernet (PoE)-enabled, and easy-to-manage Industrial Ethernet 1000 Series DIN-rail switches. Get reliable, secure connectivity out of the box. " The unit features 18 total ports for IoT devices such as robots, cameras, wireless access points, sensors, and actuators. Two ports are 10G SFP fiber slots while the other. Our Industrial Ethernet Switch portfolio comprises Managed and Unmanaged Switches with Gigabit, PoE, IEC 61850 certification, and for DIN rail mounting. This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. Industrial-grade Ethernet Switches are specifically designed to connect devices in network environments that are subject to extreme operating temperatures of -40°C to 75°C, vibrations, and shocks.
