

Optical Module Combo

Overview

FS XGS-PON Portfolio: Transceiver, ONU Stick, Combo Learn about FS XGS-PON SFP+ transceiver products, including standard modules, ONU Stick, and Combo solu.

Key Takeaways

An optical module combo is a single transceiver unit that integrates both optical transmitting and receiving functions, enabling bidirectional fiber communication in one module.

Overview

An optical module combo, often referred to as a bidirectional or “BiDi” transceiver, combines the functionalities of an optical transmitter and an optical receiver into a single compact module. It is used in high-bandwidth fiber optic communication systems to convert electrical signals into optical signals for transmission and convert incoming optical signals back into electrical signals for reception.

Structure and Components

A typical optical module combo includes: Transmitter Optical Sub-Assembly (TOSA): Contains a laser diode (LD) or light-emitting diode (LED) that converts electrical signals into modulated optical signals.

Receiver Optical Sub-

Assembly (ROSA): Contains a photodetector that converts incoming optical signals back into electrical signals. Driver and Amplifier Circuits: Control the laser output and amplify received signals to ensure signal integrity. Optical and Electrical Interfaces: Provide connectivity to fiber optic cables and the host system, often following standardized form factors like SFP, QSFP, or CFP.

Housing and Control Board (PCBA): Encases the components and manages module operation, including automatic power control for consistent signal output.

Functionality

The optical module combo enables bidirectional communication over a single fiber by using different wavelengths for transmitting and receiving signals. This reduces the need for separate fibers for each direction, saving infrastructure costs and simplifying network deployment. The module is typically hot-pluggable, allowing easy installation or replacement without shutting down the system.

Applications

Optical module combos are widely used in: Data centers for high-speed Ethernet connections Telecommunication networks for long-haul and metro fiber links Enterprise networks requiring compact, cost-effective fiber solutions By integrating both transmission and reception in one module, optical module combos improve efficiency, reduce cabling complexity, and support high-density network environments.

FS XGS-PON Portfolio: Transceiver, ONU Stick, Combo

Learn about FS XGS-PON SFP+ transceiver products, including standard modules, ONU Stick, and Combo solutions. Discover their key features

Customized XGS-PON&GPON Combo OLT SFP+ 1577nm

The 10G-TX/10G (2.5G)-RX & 2.5G-TX/1.25G-RX transceiver module is specifically designed for 10-Gigabit-capable Symmetric Passive Optical Network (XGSPON&GPON) system. It integrates

XGS-PON/GPON Combo OLT SFP+ Optical Module

OLT series include EPON/GPON/10G EPON/XG-PON/XGS-PON OLT in a compact box design to provide efficient and stable support for your network connectivity!

XGS COMBO OLT SFP+ Optical Transceiver Module

Superoxon XGS COMB PON OLT transceivers, compliant with SFP+ MSA, support single-fiber bi-directional data links with symmetric and asymmetric TX and RX

XGS Combo PON OLT SFP+ | Broadex Technologies

Supports both ITU-T G.9807.1 & G.987.2 XGSPON & XGPON OLT N1 and ITU-T G.984.2 GPON OLT B+ application. FTTx networks, 5G wireless networks and

How Combo PON Integrates GPON and XGS-PON for Scalable Fiber

Combo PON is a game-changer for fiber operators balancing legacy investments with next-gen demands. By unifying GPON and XGS-PON on a single platform, it reduces upgrade costs,

XGS-PON & GPON Combo OLT Transceiver | SFP

This module is designed for OLT equipment that supports SFP+ Combo interfaces. Common compatible vendors include Huawei, ZTE, Nokia, and FiberHome,

XGSPON&GPON Combo OLT SFP+ N2/C+ Module

XGSPON&GPON Combo OLT SFP+ N2/C+ transceiver is designed to transmit and receive data over SMF and supports 20km transmission distance - AscentOptics.

FTTx Transceivers | HiSilicon Optoelectronics

For gigaband access, HiSilicon provides the following optical modules: XGS Combo PON OLT Class C+, XGS-PON OLT Class N1/N2/E1/E2 and GPON OLT Class

XGS-PON/GPON Combo OLT SFP+ Optical Module

Discover the advanced XGS-PON/GPON Combo OLT SFP+ Optical Module by VSOL, designed for efficient and high-speed fiber optic network solutions.

Integra Optics Unveils Groundbreaking XGS-PON & GPON Combo

“This module is designed to solve real-world networking challenges, offering unparalleled distance coverage, compliance with industry standards, temperature versatility and a simplified

XGS-PON&GPON Combo OLT SFP+ Class D 20km DOM SC SMF Optical

Description The 10G-TX/10G(2.5G)-RX & 2.5G-TX/1.25G-RX transceiver module is specifically designed for 10-Gigabit-capable Symmetric Passive Optical Network (XGSPON&GPON) system. It integrates

XGSPON&GPON Combo OLT SFP+ N2/C+ Module | AscentOptics

XGSPON&GPON Combo OLT SFP+ N2/C+ transceiver is designed to transmit and receive data over SMF and supports 20km transmission distance - AscentOptics.

XGS-PON/GPON Combo OLT C+ SFP+ | Dual-Mode | EDGEOPTIC

EDGEOPTIC XGS-PON/GPON Combo OLT SFP+: dual-mode 10G/2.5G, 35dB/34dB budget, 20km SMF. SC/UPC for seamless FTTH migration from GPON to XGS-PON networks.

Next generation access network new product 50G Combo PON OLT

Genuine Optics 's latest 50G PON&XGSPON&GPON three-mode Combo OLT optical module is packaged in QSFP112. The optical power link budget meets the Class C+, the isolation

XG-PON&GPON Combo OLT SFP+ 1577nm-Tx/1270nm-Rx and

The Combo XGPON OLT optical module is inserted on the single board of Combo XGPON OLT device, which can provide users with a symmetrical bandwidth with a maximum uplink and downlink rate of

XGSPON&GPON Combo OLT SFP+ D2/C+ Module | AscentOptics

XGSPON&GPON Combo OLT SFP+ D2/C+ module is a combination of XGS-PON OTL and GPON OTL optical transceiver links up to 20 kilometers with SMF - AscentOptics.

Wave Optics Software for Analyzing Micro

Simulate and optimize optical devices by combining the COMSOL Multiphysics® software and the add-on Wave Optics Module. Learn more here.
