## Overview

Deliveries and prices Our 100% Belgian cable support systems are currently available all over Europe. If you would like to be put in touch with your distri.

## Key Takeaways

Cable tray supports in Belgium typically range from €10 to €150 per unit, depending on type, material, and load capacity.

### Overview of Cable Tray Supports

Cable tray supports are essential for safely installing and managing electrical wiring without underground work. Common types include: Wall Supports: Fixed to walls for permanent installations, suitable for medium to heavy loads. Hanging Supports: Suspended from ceilings or beams, height-adjustable, ideal for flexible layouts.

Floor Supports: Provide a stable base for heavy cable loads, protecting cables from moisture. Stair Supports: Designed for multi-level installations, capable of handling additional weight.

### Right-

Angle Supports: Secure trays at right angles to walls or structures.

## Price Estimates

The price of cable tray supports in Belgium varies based on material, load rating, and supplier: Light-duty supports (aluminum or light steel, small spans): approximately €10–€30 per unit. Medium-duty supports (galvanized steel, standard load capacity): approximately €30–€70 per unit. Heavy-duty supports (stainless steel, high load or outdoor use): approximately €70–€150 per unit.

Specialized supports, such as adjustable hanging systems or stair supports, may cost more due to customization and installation flexibility.

## Factors Affecting Pricing

Material: Galvanized steel is common for industrial use, stainless steel for corrosive environments, and aluminum for lightweight applications. Load Class: Supports designed for heavy cable loads or long spans are more expensive. Supplier Type: Domestic Belgian manufacturers like Trayco may offer competitive pricing and tailored solutions, while international brands may charge a premium for specialized products.

Project Scale: Bulk orders for large construction or industrial projects may reduce per-unit costs, whereas small-scale or retrofit installations may be more expensive per unit.

## Market Context

The Belgian cable tray market is mature and evolving, with demand driven by industrial modernization, data centers, and smart building projects. Suppliers focus on value-added products with higher load ratings, corrosion resistance, and adaptability for future upgrades. This trend influences the pricing of cable tray supports, as higher-quality or specialized supports command higher prices.

In summary, when budgeting for cable tray supports in Belgium, expect €10–€150 per unit, with the final cost influenced by material, load capacity, type of support, and supplier selection.
