Price for cable tray removal

Overview

Electrical Cable Laying Rate ListThe document lists rates for various electrical works including cable laying, termination, earthing, cable trays, and pane.

Key Takeaways

Cable tray removal typically costs between $10 to $50 per meter, depending on material, size, and labor complexity.

Cost Factors

Material Type

Steel trays are common and generally less expensive to remove due to their widespread use and availability of tools. Aluminum trays are lighter but may require careful handling to avoid bending, slightly increasing labor costs. Fiberglass or stainless steel trays are more durable and may require specialized labor, raising removal costs.

Tray Size and Complexity

Larger or multi-tiered trays require more labor and time to dismantle. Trays with numerous bends, fittings, or supports increase the difficulty of removal, impacting the price.

Labor Costs

Skilled electricians or technicians are typically required to safely unlay cable trays, especially in industrial or high-voltage environments. Labor rates vary by region and project complexity, but removal is generally less expensive than installation due to fewer precision requirements.

Disposal and Recycling

Some contractors include disposal or recycling fees in the removal cost. Steel and aluminum can often be recycled, potentially offsetting part of the expense. Typical Price RangeSmall-scale or office installations: $10–$20 per meterCommercial or industrial installations: $20–$50 per meter, depending on height, accessibility, and tray complexity RecommendationsObtain site-specific quotes from contractors, as costs vary with location, tray type, and project scale.

Consider modular or snap-together trays, which are easier and faster to remove, reducing labor costs. If planning a replacement, some contractors offer combined removal and installation packages, which can be more cost-effective. By evaluating these factors, you can budget accurately for cable tray removal and ensure safe, efficient dismantling.
