Price of Vertical Supports for Ladder-Type Cable Trays

Overview

Discover high-quality cable ladder risers from $1.09 to $12.00, available in stainless steel and aluminum. Purchase cable tray systems in bulk, starting with just 1 unit, ideal for resale.

Key Takeaways

The price of vertical supports for ladder-type cable trays varies widely depending on material, size, load rating, and manufacturer, typically ranging from $20 to over $100 per support in commercial markets.

Overview of Vertical Supports

Vertical supports are essential components in ladder-type cable tray systems, allowing the tray to change elevation or direction vertically while maintaining structural integrity and proper cable routing. They are commonly used in industrial, commercial, and data center installations where cable trays must navigate ceilings, walls, or multi-level structures.

Factors Affecting Price

Material: Supports are typically made from steel, stainless steel, or aluminum. Stainless steel and aluminum offer corrosion resistance and are more expensive than standard galvanized steel. Load Capacity: Supports designed for heavier cable loads or longer spans require thicker or reinforced construction, increasing cost.

Height and Size: Taller or custom-length vertical supports cost more due to additional material and fabrication requirements. Finish and Coating: Galvanized, powder-coated, or painted finishes improve durability and environmental resistance, affecting price. Manufacturer and Brand: Premium brands like Eaton B-Line or Legrand may charge higher prices due to quality, certifications, and system compatibility.

Typical Price Range

Standard galvanized steel vertical supports: $20–$50 eachAluminum or stainless steel supports: $50–$100+ eachCustom or heavy-duty supports: Prices can exceed $150 depending on specifications and project requirementsAdditional ConsiderationsCompatibility: Ensure the vertical support matches the ladder tray width, rung spacing, and load rating. Installation Costs: Labor and mounting hardware may add 20–40% to the total cost of the support system. Bulk Orders: Purchasing in larger quantities often reduces the per-unit cost.

For precise pricing, it is recommended to contact suppliers or distributors such as Grainger, Eaton, or Legrand, providing the specific tray dimensions, load requirements, and material preferences. This ensures accurate quotes tailored to your project.
