

Price of cable tray supports near Canada

Overview

Wire Cable Trays, Wire Management Baskets & Accessories Cable trays and baskets are designed to help support and route cable bundles in an organized manner.

Key Takeaways

Cable trays in Canada typically range from CAD 20 to CAD 200 per meter, depending on material, style, and brand. Price Ranges by Type and Material Wire Mesh Cable Trays: Premium options like Legrand Cablofil can cost CAD 80-200 per meter due to high-quality galvanizing, accessory compatibility, and durability, making them suitable for large-scale or industrial installations. Ladder and Ventilated Trays: Mid-range options, such as Cooper B-Line 22A Series, generally cost CAD 50-120 per meter, offering standardized fittings and reliable load support for commercial projects.

Solid-

Bottom Trays: Heavier-duty systems like Chalfant or similar brands may range CAD 100-200 per meter, providing maximum protection for sensitive cables.

Channel/

Strut Systems: Lightweight options like Thomas & Betts Kindorf channel trays are more economical, typically CAD 30-80 per meter, ideal for retrofit or light-to-medium duty applications.

PV

C Cable Trays: Budget-friendly and corrosion-resistant, PVC trays such as Cablofil EZ Tray PVC usually cost CAD 20–60 per meter, suitable for residential, office, or industrial environments.

Factors Affecting Cost

Material: Stainless steel and fiberglass are more expensive than galvanized steel or PVC due to corrosion resistance and durability. **Tray Style:** Wire mesh and ladder trays often cost more than simple channel or trough designs because of manufacturing complexity and load capacity. **Size and Load Capacity:** Wider trays or those designed for heavy-duty applications increase the price per meter.

Brand and Certification: Premium brands with CSA or UL compliance, like Legrand or Cooper B-Line, command higher prices but offer long-term reliability and easier installation. **Accessories and Installation:** Additional fittings, brackets, and labor costs can significantly affect the total installed cost.

Summary

For Canadian buyers, expect to pay CAD 20–60 per meter for PVC or basic wire trays, CAD 50–120 per meter for mid-range ladder or ventilated trays, and CAD 80–200 per meter for premium wire mesh or solid-bottom systems. Choosing the right tray depends on your project's load requirements, environmental conditions, and long-term durability needs.
