Price of electrical distribution box under balcony

Overview

Outdoor distribution box, waterproof project housing for electrical. This outdoor junction box features dust-proof sealing and a robust protective mechan.

Key Takeaways

The cost of an electrical distribution box suitable for installation under a balcony typically ranges from $50 to $300, depending on size, material, and weatherproofing.

Pricing Overview

For a standard residential or small commercial distribution box, prices vary based on material, amperage, and features. Basic single-gang plastic boxes can cost $25–$50, while metal or weatherproof boxes designed for outdoor use, such as under a balcony, generally range from $75 to $200 for the box itself. High-quality units with advanced features, such as smart monitoring or corrosion-resistant stainless steel, can exceed $300.

Factors Affecting Cost

Material: Plastic boxes are cheaper, while powder-coated steel or stainless steel boxes are more durable and weather-resistant. Weatherproofing: Outdoor-rated boxes with IP65 protection or rubber seals for dust and water resistance are essential for balcony installations and carry a premium. Size and Capacity: Larger boxes with multiple circuits or higher amperage ratings cost more.

Single-gang boxes are inexpensive, while multi-gang or three-phase boxes are pricier. Installation: Labor costs vary by region and complexity. Simple installations may cost $75–$150, while more complex setups with wiring upgrades can push total costs to $150–$300 or more.

Additional Features: Hinged lids, integrated breakers, surge protection, or smart monitoring systems increase the price.

Practical Considerations

Ensure the box is weatherproof and rated for outdoor use to prevent corrosion and electrical hazards. Choose a size appropriate for your circuits and future expansion. Professional installation by a licensed electrician is recommended to comply with building codes and maintain insurance coverage.

In summary, for a balcony installation, expect to pay $75–$200 for a weatherproof distribution box, with total costs including installation potentially reaching $150–$300, depending on materials, size, and labor requirements.
